Draw a Halloween House

Reference I Worked scene I A4

Original prompt

Draw one Halloween house with a body, overhanging roof, door, window, a jack-o-lantern beside the door, two bats above the roof, and a cobweb in one upper corner.

Answer

A single house dominates the page: tall body, wide roof, door at base, window above. The jack-o-lantern sits on the ground beside the door with a carved face. Two bats fly above the roof edge. A cobweb runs from the roof corner to the wall.

Reasoning

Building the house first gives the decorations a fixed home, so the jack-o-lantern, bats, and cobweb attach to the house instead of floating as separate objects.

Check

Look at the drawing: the house is the largest shape, the roof overhangs the body, and every decoration touches or points to the house.
