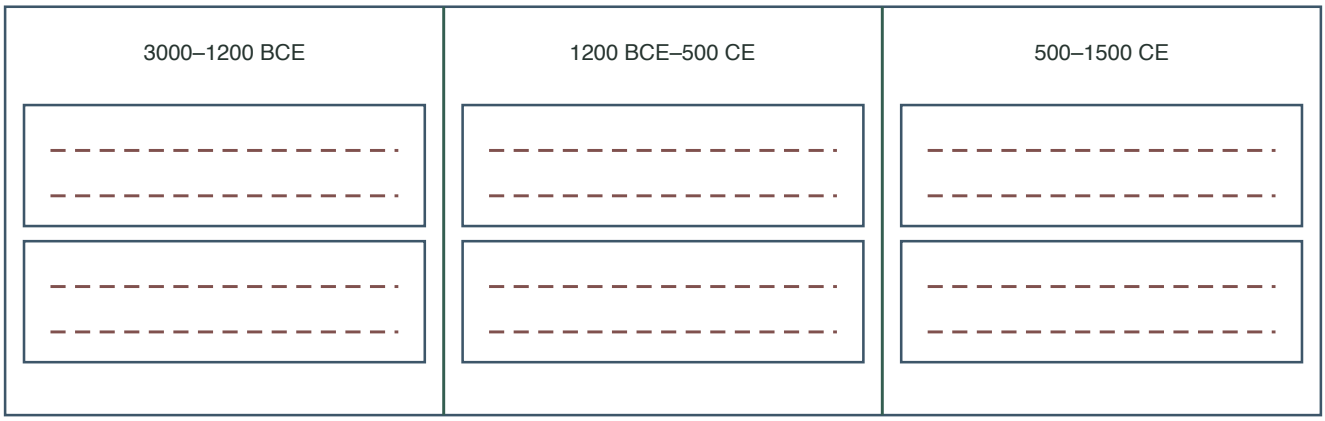
World History Timeline Template

Answer | Task 1 of 4 | A4

Original prompt

Task 1: Draw the empty strip. Draw one horizontal band, divide it into three era bands labeled with the chosen ranges 3000–1200 BCE, 1200 BCE–500 CE, and 500–1500 CE, and draw two empty event boxes in each band.



Answer

A horizontal band divided into three labeled era bands in the order given, with two empty event boxes inside each band. Each box has a date line and an event-label line.

Reasoning

The strip is built left to right from oldest to newest, and every box sits inside a band rather than outside the strip.

Check

Count three era bands and six empty boxes, with two boxes inside each band.

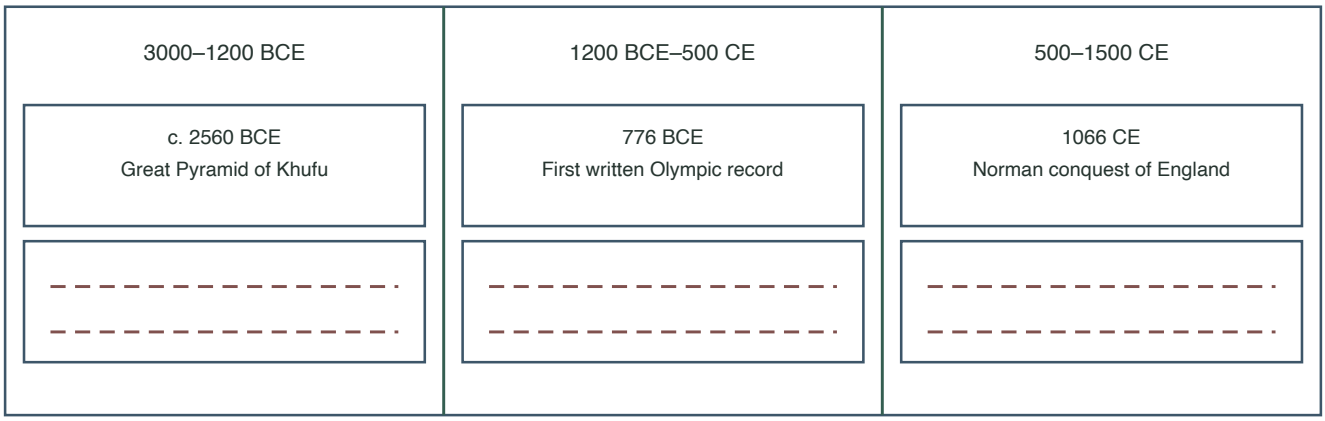
Answer I Task 2 of 4 I A4

Original prompt

Task 2: Fill the strip from Task 1 with these chosen events: 2560 BCE 'Great Pyramid built', 776 BCE 'First recorded Olympic Games', 1066 CE 'Norman conquest of England'. Place each event in the correct era band.



Answer

Use about 2560 BCE for the Great Pyramid of Khufu in 3000–1200 BCE, 776 BCE for the first written Olympic record in 1200 BCE–500 CE, and 1066 CE for the Norman Conquest of England in 500–1500 CE. Write c. before the approximate pyramid date.

Reasoning

Each date is compared with the chosen range of each band, and the box is placed in the band whose range contains that date.

Check

Read left to right: 2560 BCE, 776 BCE, 1066 CE. Each box is inside the band whose range contains its date.

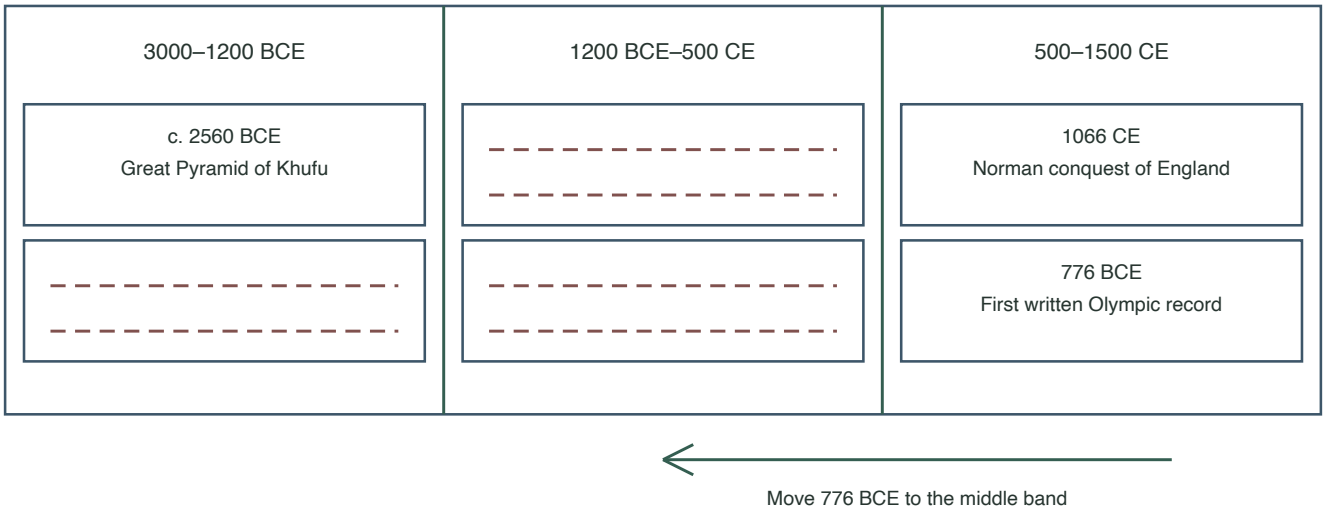
Answer I Task 3 of 4 I A4

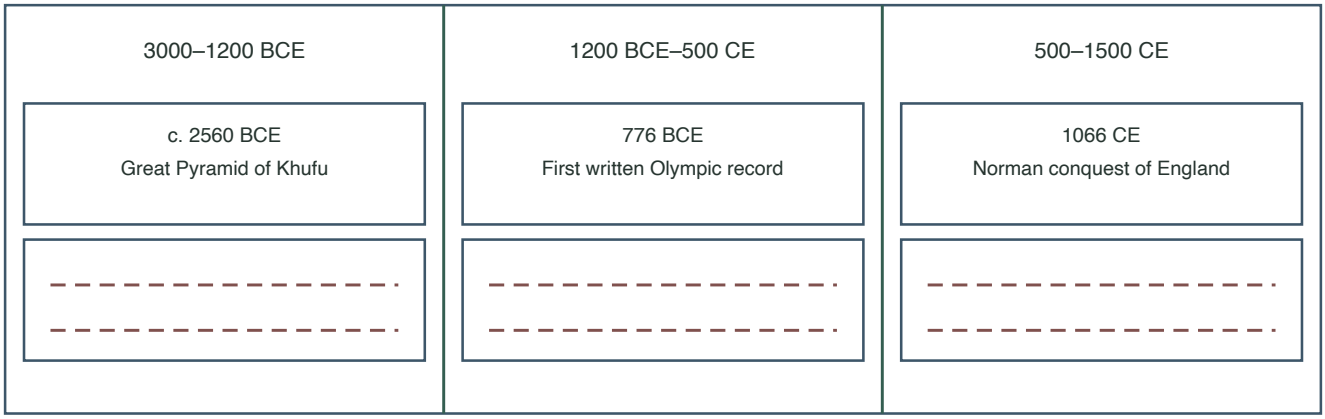
Original prompt

Task 3: Redraw the strip from Task 2, but move the 776 BCE event into the 500–1500 CE band. Then explain why that placement is wrong and correct it.

Given placement to correct



Corrected placement



Answer

The 776 BCE box is outside its matching band because 776 BCE is earlier than 500 CE. The correction is to move the box back into the 1200 BCE–500 CE band.

Reasoning

A box belongs in the band whose chosen range contains its date; 776 BCE does not fall inside 500–1500 CE.

Check

Compare the date in each box with the range printed on its band; every box should match its band.

World History Timeline Template

Original prompt

Task 4: Design your own strip with three era bands of your choosing, each labeled with a date range, and place one event box in each band. Then check that the dates read left to right and that each box sits in the correct band.

3000–1601 BCE	1600 BCE–799 CE	800–1500 CE
c. 2560 BCE Great Pyramid of Khufu	776 BCE First written Olympic record	1066 CE Norman conquest of England

Answer

A strip with three labeled era bands in increasing date order, one event box per band, and dates that increase from left to right. Each box sits inside the band whose range contains its date.

Reasoning

The design follows the same build and check steps: label bands oldest to newest, place each box by date range, then read left to right to confirm order.

Check

Read the strip left to right and confirm the dates increase and each box matches its band's range.
