Cat Return Address Labels

Reference | Worked label layout | LETTER

Prompt

Build one complete cat return-address label sheet using the worked example address and a seated cat motif, then check it.

Answer

A sheet of repeated rectangular labels. Each label has 'J. Rivera / 14 Alder Lane / Millbrook, OR 97000' in the upper-left field and a seated cat silhouette in the lower-right corner. A rectangle cut guide surrounds each label with a small gap between labels. Check: read the address on every label; confirm the cat motif does not cover the text; trace each guide to confirm it encloses one label and crosses no text.

Reasoning

The address is the functional content, so it sits in a clear field. The cat motif is decorative and stays in a corner. The cut guides follow the label boundaries so labels separate cleanly without clipping text.

Check

Read the address aloud from each label, point to the cat motif to confirm it is clear of the text, and trace each cut guide to confirm it encloses exactly one label.

Cat Return Address Labels

Reference | Blank trim sheet | LETTER

Write three address lines in each label. Cut around the outer dashed guides.
