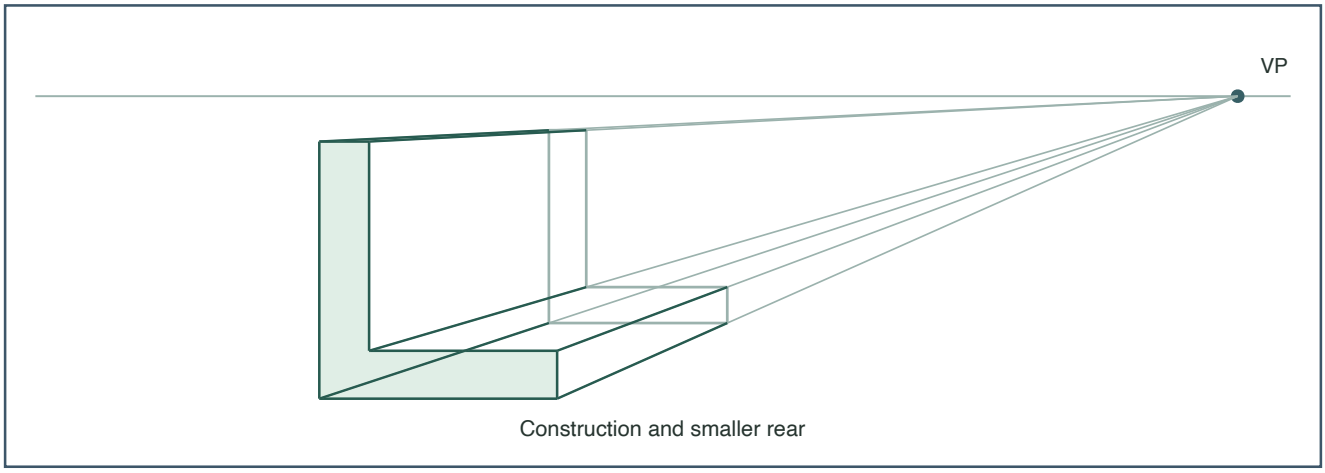
Draw Text in One-Point Perspective

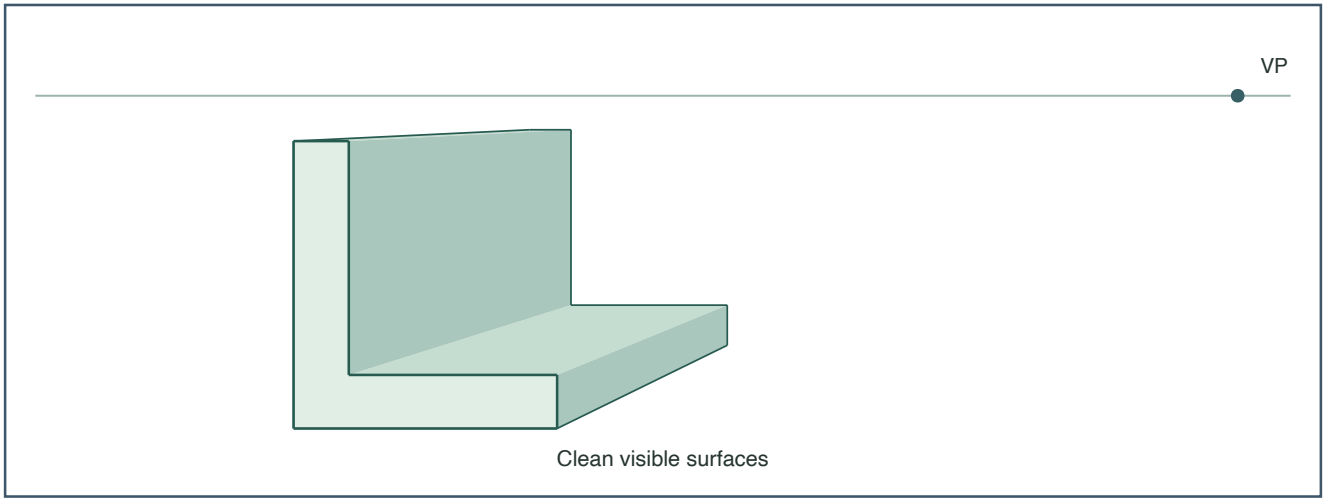
Reference I Worked example I A4

Original prompt

Draw the letter L in one-point perspective with a marked horizon and vanishing point.



Construction and smaller rear



Clean visible surfaces

Answer

Show the front L on one plane, the horizon and marked vanishing point, a guide from each corner, and a smaller parallel back L. Its matching corners sit at the same fraction on their rays. Use a separate clean view to show the visible edges.

Reasoning

A common fraction scales the entire outline by the same amount. The printed ruler lengths can differ, while the back face stays parallel and the physical depth stays uniform.

Check

Use a straight edge: every depth edge must pass through the vanishing point, and the back L must be parallel to the front L.
