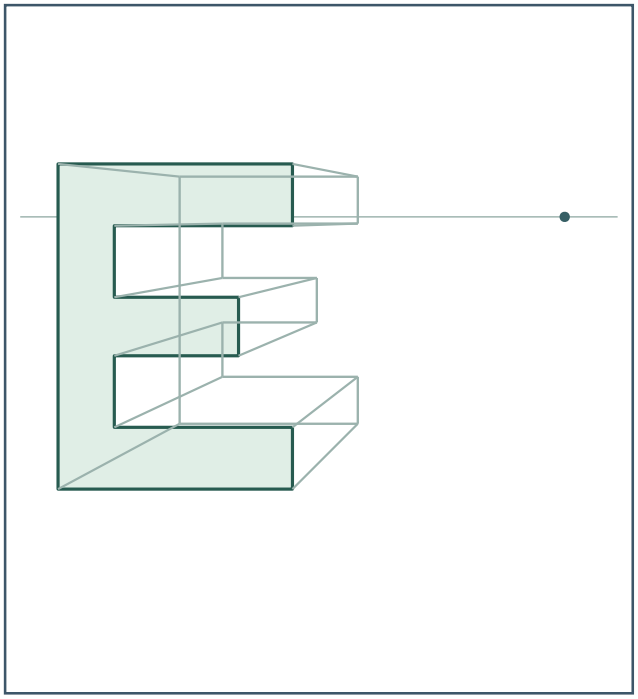
Draw Letter E in One-Point Perspective

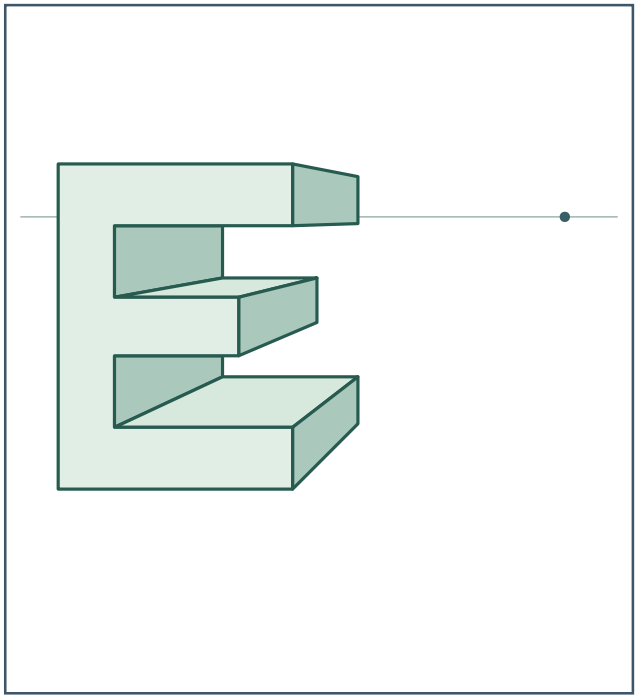
Reference I Worked example I Figure 1 I A4

Original prompt

Draw a capital E in one-point perspective with the vanishing point to the right of the letter.



Complete rear outline and edges



Visible surfaces

Answer

Figure 1 shows the front face, the depth lines to the vanishing point, the smaller back face, and the visible depth edges. All depth edges converge on the single vanishing point.

Reasoning

The front face keeps its flat E shape. Each corner connects to the vanishing point, and the back face is placed along those lines at a chosen depth. The result reads as a solid letter receding to one point.

Check

Trace each depth edge back to the vanishing point. Confirm the back face is smaller than the front face and parallel to it.
