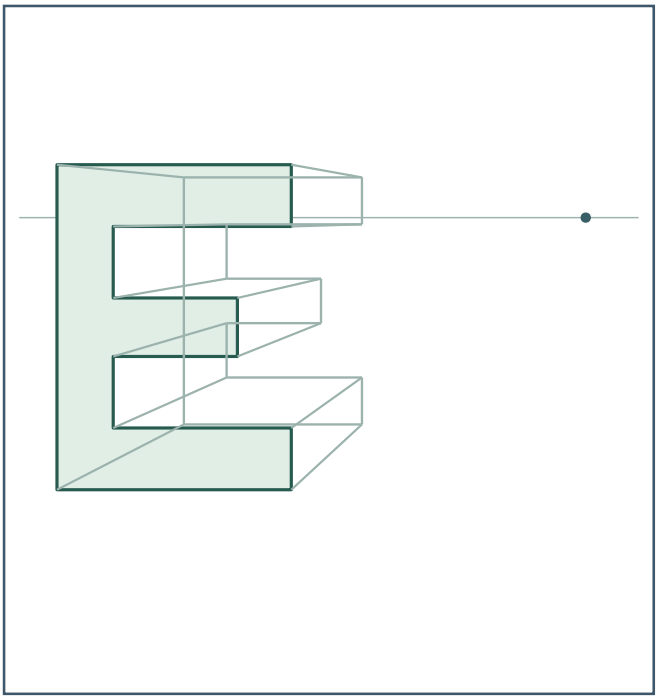
# Draw Letter E in One-Point Perspective

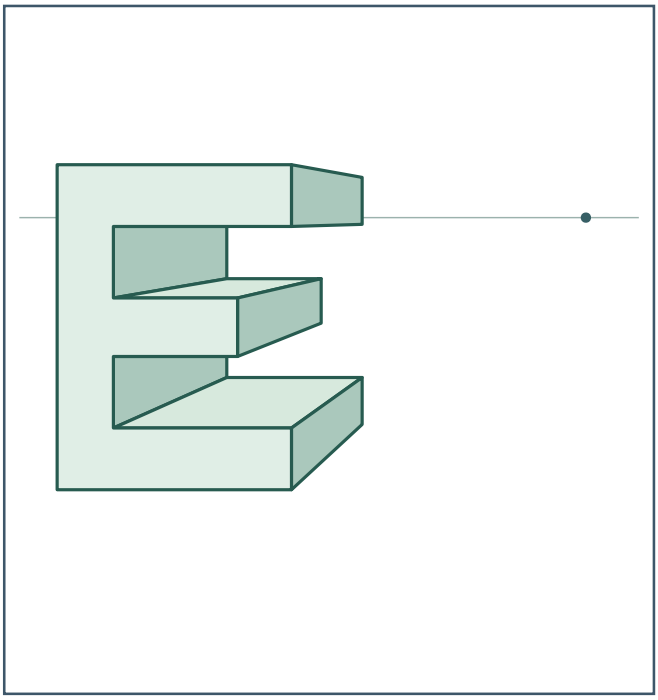
Reference I Worked example I Figure 1 I LETTER

## Original prompt

Draw a capital E in one-point perspective with the vanishing point to the right of the letter.



Complete rear outline and edges



Visible surfaces

## Answer

Figure 1 shows the front face, the depth lines to the vanishing point, the smaller back face, and the visible depth edges. All depth edges converge on the single vanishing point.

## Reasoning

The front face keeps its flat E shape. Each corner connects to the vanishing point, and the back face is placed along those lines at a chosen depth. The result reads as a solid letter receding to one point.

## Check

Trace each depth edge back to the vanishing point. Confirm the back face is smaller than the front face and parallel to it.
