Draw a Rug in One-Point Perspective

Student | Task 1 of 4 | A4

Original prompt

Task 1: On a blank page, set a horizon line across the upper middle and mark one vanishing point on it. Draw two recession lines from the lower page toward that point, then close them with a front edge and a back edge parallel to the picture plane to form the rug outline.

Draw a Rug in One-Point Perspective

Student | Task 2 of 4 | A4

Original prompt

Task 2: On a blank page, first draw a rug outline using the Task 1 method (horizon line, one vanishing point, two recession lines, front and back edges parallel to the picture plane). Then add a simple banded pattern carried across the rug so the depth-running band lines converge to the same vanishing point.

Draw a Rug in One-Point Perspective

Student | Task 3 of 4 | A4

Original prompt

Task 3: On a blank page, first draw a rug outline using the Task 1 method. Then add floor recession lines around the rug so the floor visibly recedes, and check that the rug sits convincingly on that floor.

Draw a Rug in One-Point Perspective

Student | Task 4 of 4 | A4

Original prompt

Task 4: On a blank page, combine the rug outline, floor recession, and rug pattern into one complete drawing using the Task 1 method for the outline, then add floor recession lines and a banded pattern, and perform the visual check.
