# Draw Lines and Shapes

Reference | Start and finish marks | A4

## How to use this sheet

Use the dot at the start. The last dot ends an open stroke. A closed outline returns to the same dot.

Trace horizontal line

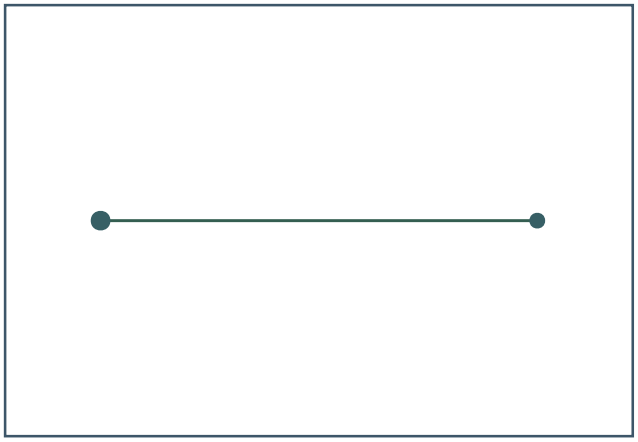
# Draw Lines and Shapes

Reference | Worked tracing | A4

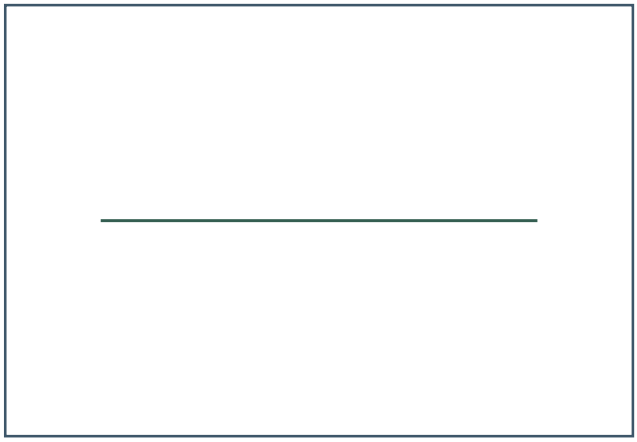
## Original prompt

Trace the horizontal line guide from its left start dot to its right end dot, then repeat the stroke once in the blank space. Trace the circle guide from its top start dot around once back to the top, then draw one freehand circle.

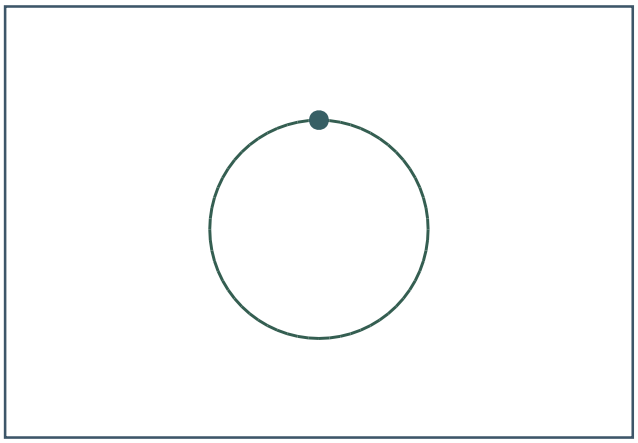
Horizontal line guide



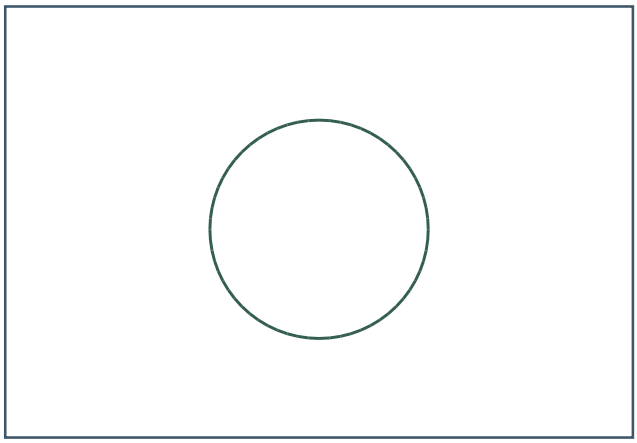
Example repeat



Circle guide



Example repeat



## Answer

The traced line runs left to right and ends on the right end dot; the freehand line is horizontal and spans the same start and end positions. The traced circle returns to the top start dot; the freehand circle is closed and round.

## Reasoning

Tracing follows the guide exactly, so the traced pass should sit on the guide stroke. The freehand repeat is checked against the guide for direction, shape and start/end position rather than for exact overlap.

## Check

Lay the traced pass over the guide: it should cover the guide stroke. For the freehand repeat, confirm the start and end dots are matched and the stroke direction is the same.
