Draw 2D Shapes Worksheet

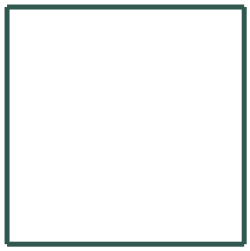
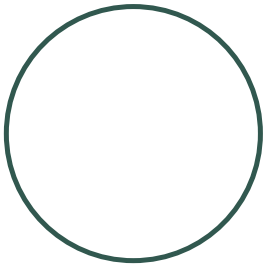
Reference | Worked example | A4

Original prompt

Draw a square and a circle from the reference, then check each outline.



Square



Circle

Answer

A closed square with four equal straight sides and four corners, and a closed circle with one smooth curved edge and no corners.

Reasoning

The square is built from four straight sides meeting at corners; the circle is one continuous curve returning to its start.

Check

Confirm the square is closed with four corners and equal sides, and the circle is closed with no corners.
