Draw a One-Point Perspective Portrait

Student | Task 1 of 4 | A4

Original prompt

Task 1: Construct a front-facing head in one-point perspective with the vanishing point directly behind the head. Include the eye-level line, front oval, four depth lines, back of skull, and neck.

Your drawing or correction

Draw a One-Point Perspective Portrait

Student | Task 2 of 4 | A4

Original prompt

Task 2: Construct the same head with the vanishing point placed to the left of the head. Show how the back of the skull shifts toward the left vanishing point.

Your drawing or correction

Draw a One-Point Perspective Portrait

Student | Task 3 of 4 | A4

Original prompt

Task 3: Redraw the worked example with the whole eye-level line raised, keeping the vanishing point on it, so the viewer's eye height is higher relative to the head. Keep features on the front plane and project the back of the skull and neck toward the raised vanishing point.

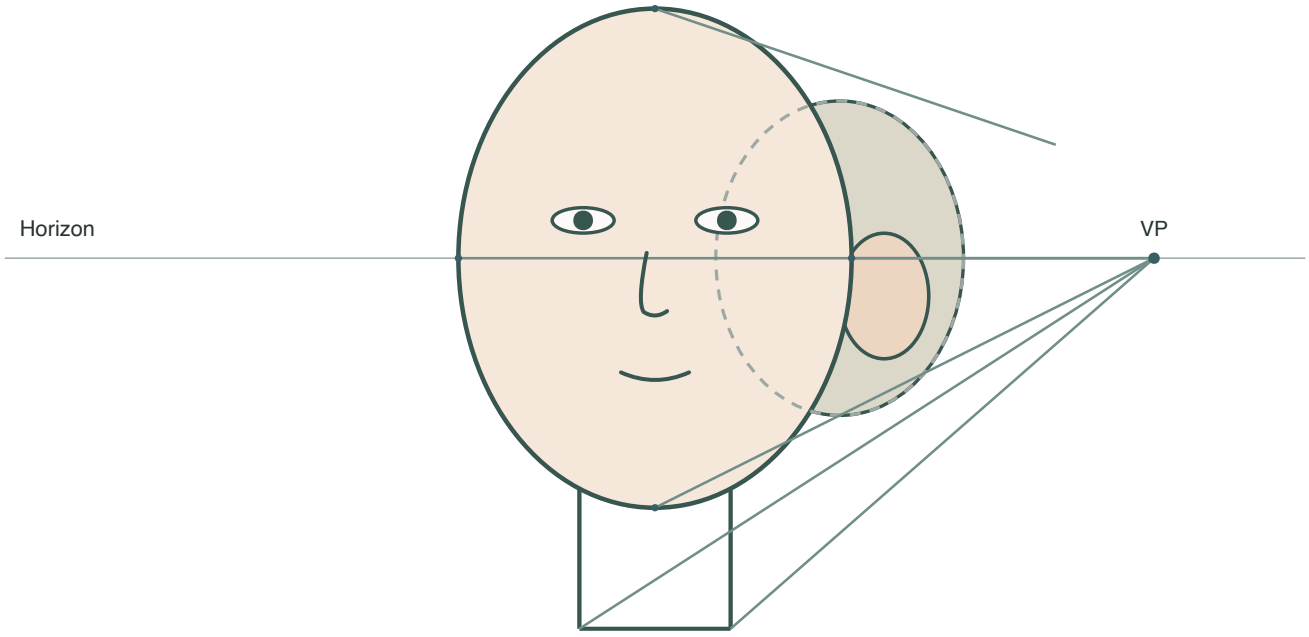

Your drawing or correction

Draw a One-Point Perspective Portrait

Student | Task 4 of 4 | A4

Original prompt

Task 4: A finished one-point perspective head is supplied with one depth line drawn to the wrong point. Find the misplaced line, redraw it so it meets the single vanishing point, and label which line was corrected.
