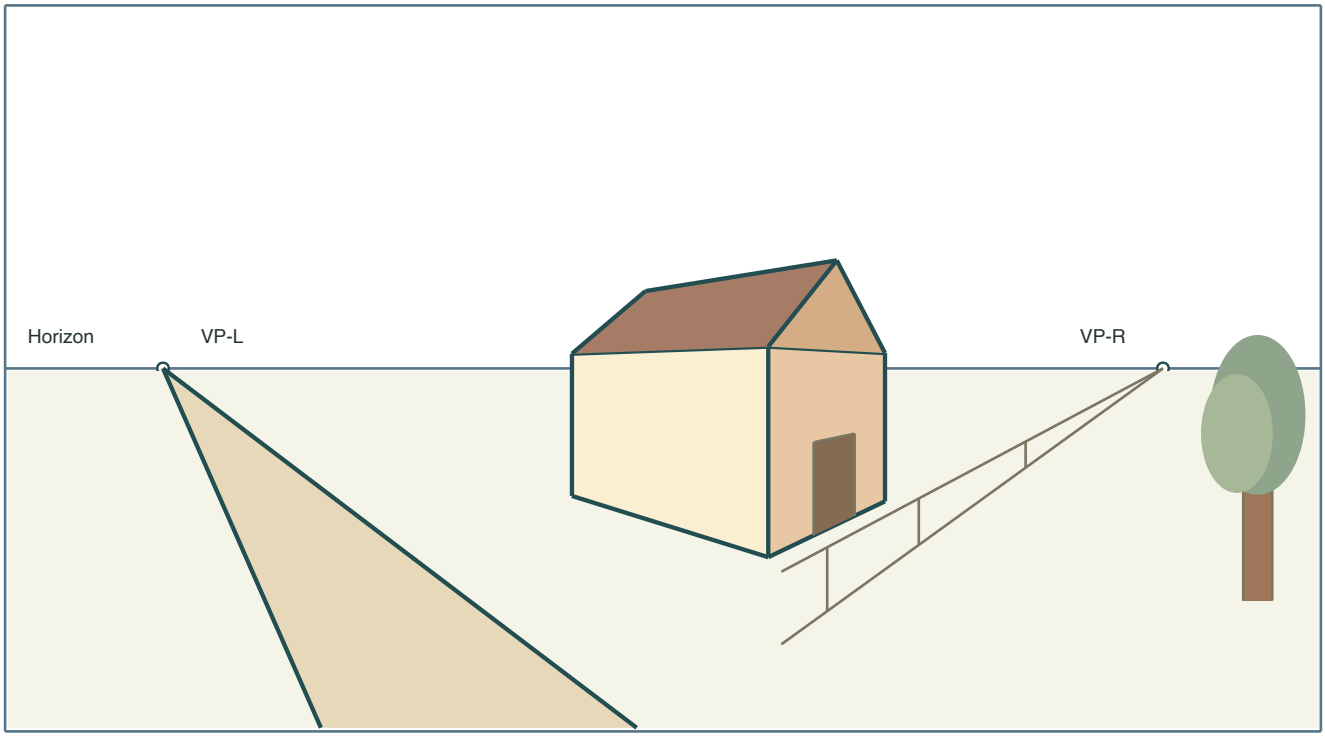
Draw a Two-Point Perspective Landscape

Reference | Landscape reference | A4

Compare the two wall directions with the road and the fence.

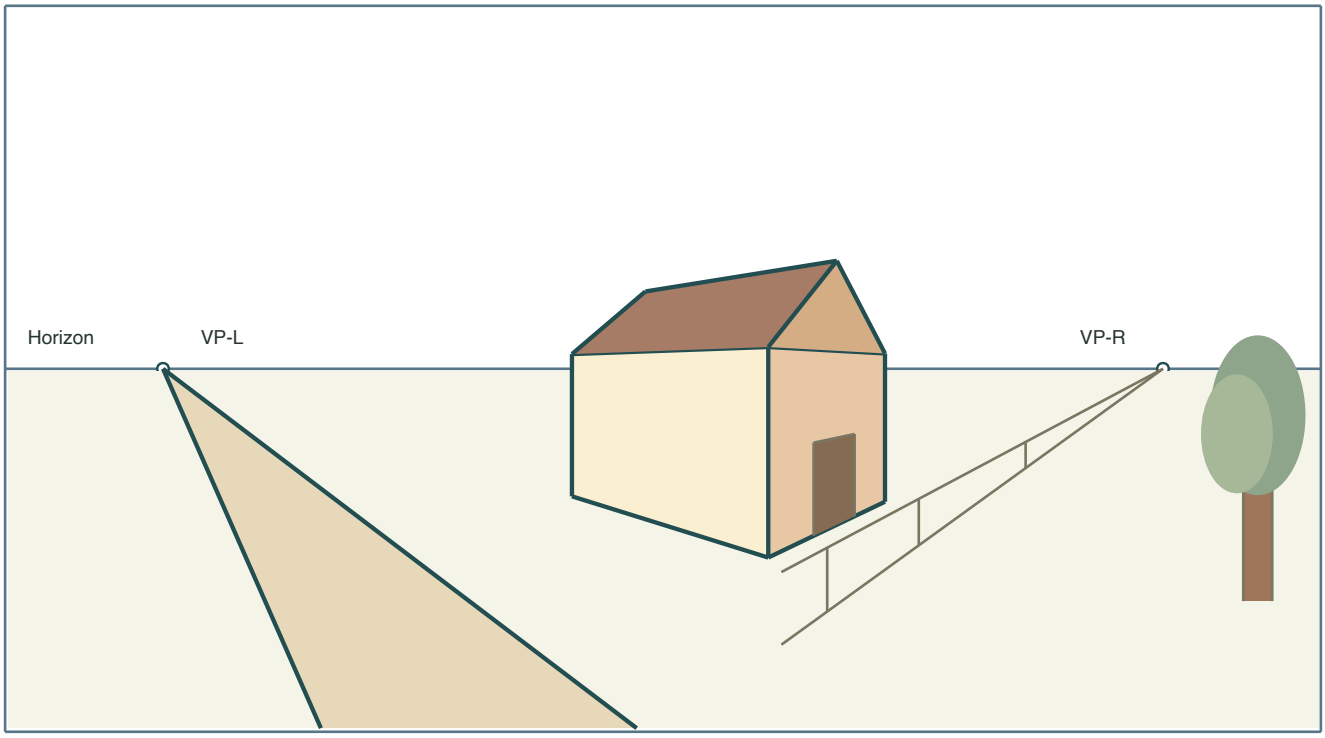


Draw a Two-Point Perspective Landscape

Reference | Worked example | A4

Original prompt

Construct a two-point perspective landscape with a barn, a road to VP-L, and a fence to VP-R.



Answer

Horizon line with VP-L left and VP-R right; barn front corner vertical; left wall edges to VP-L; right wall edges to VP-R; far corners vertical; road lines meeting at VP-L; fence lines meeting at VP-R; posts and tree trunk vertical.

Reasoning

Two-point perspective uses two vanishing points on the horizon for the two receding edge families, while verticals stay upright; assigning the road to VP-L and the fence to VP-R keeps each direction consistent.

Check

Extend the horizontal wall, road and fence edges to their assigned points on the horizon. Check upright edges for verticality and the sloping gable edges for connections to ridge and eaves.
