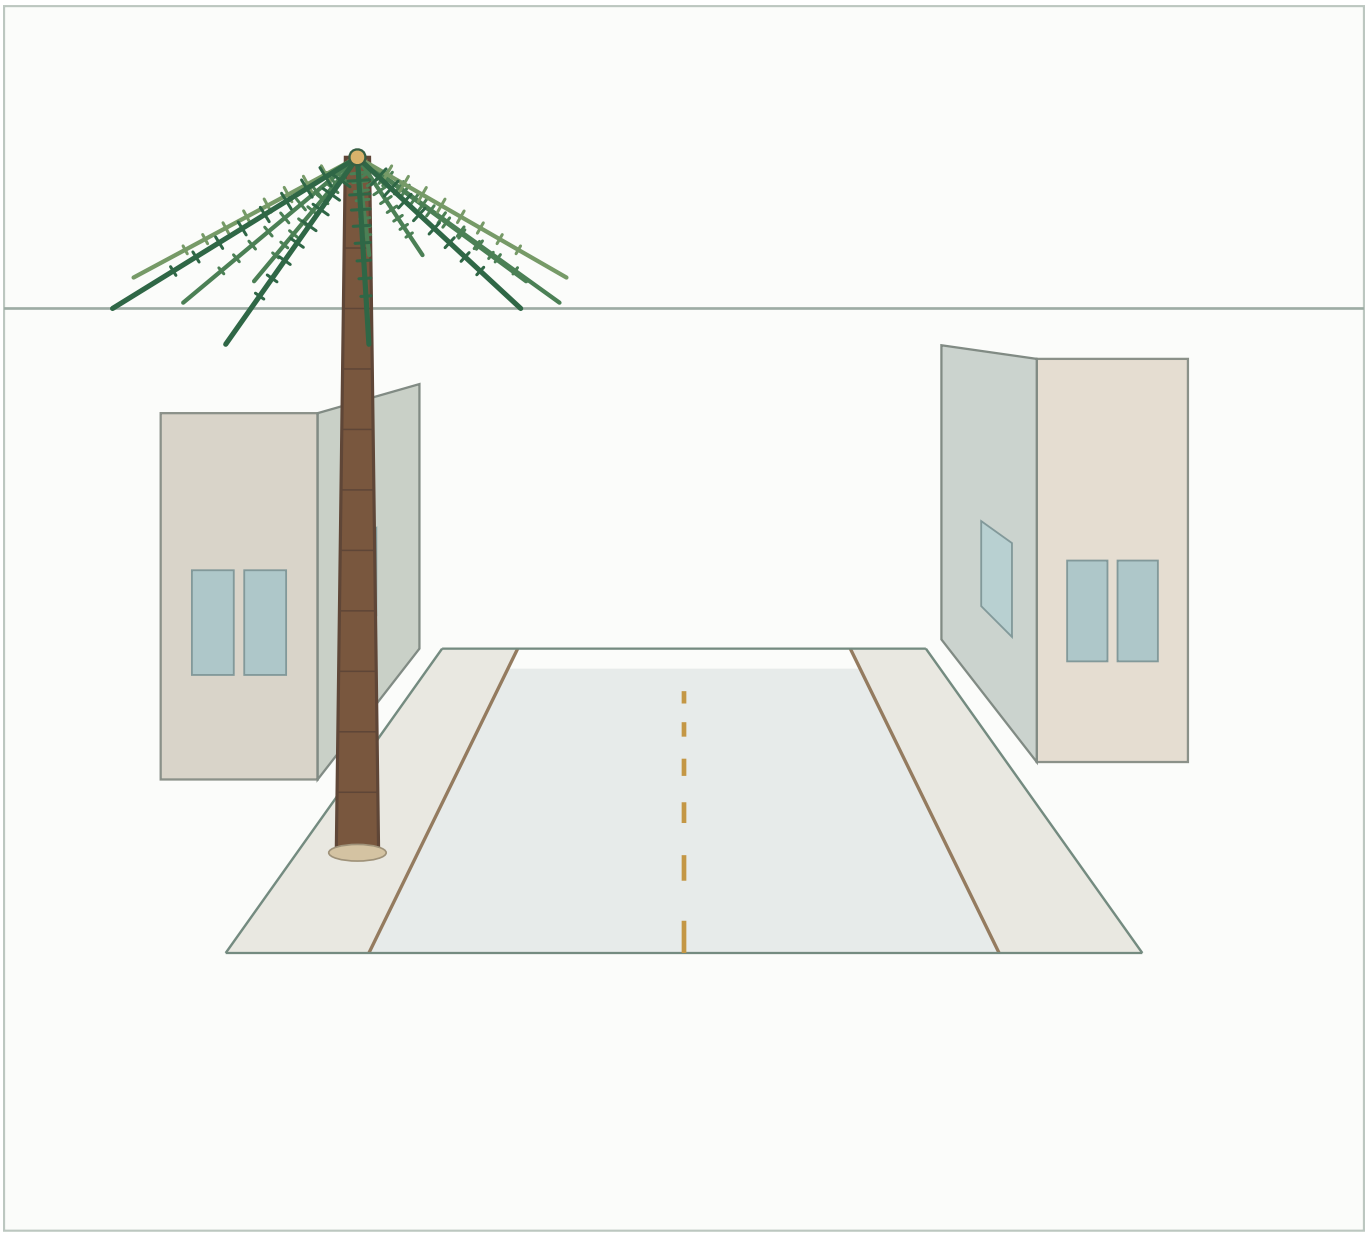
Draw a Palm Tree in Street Perspective

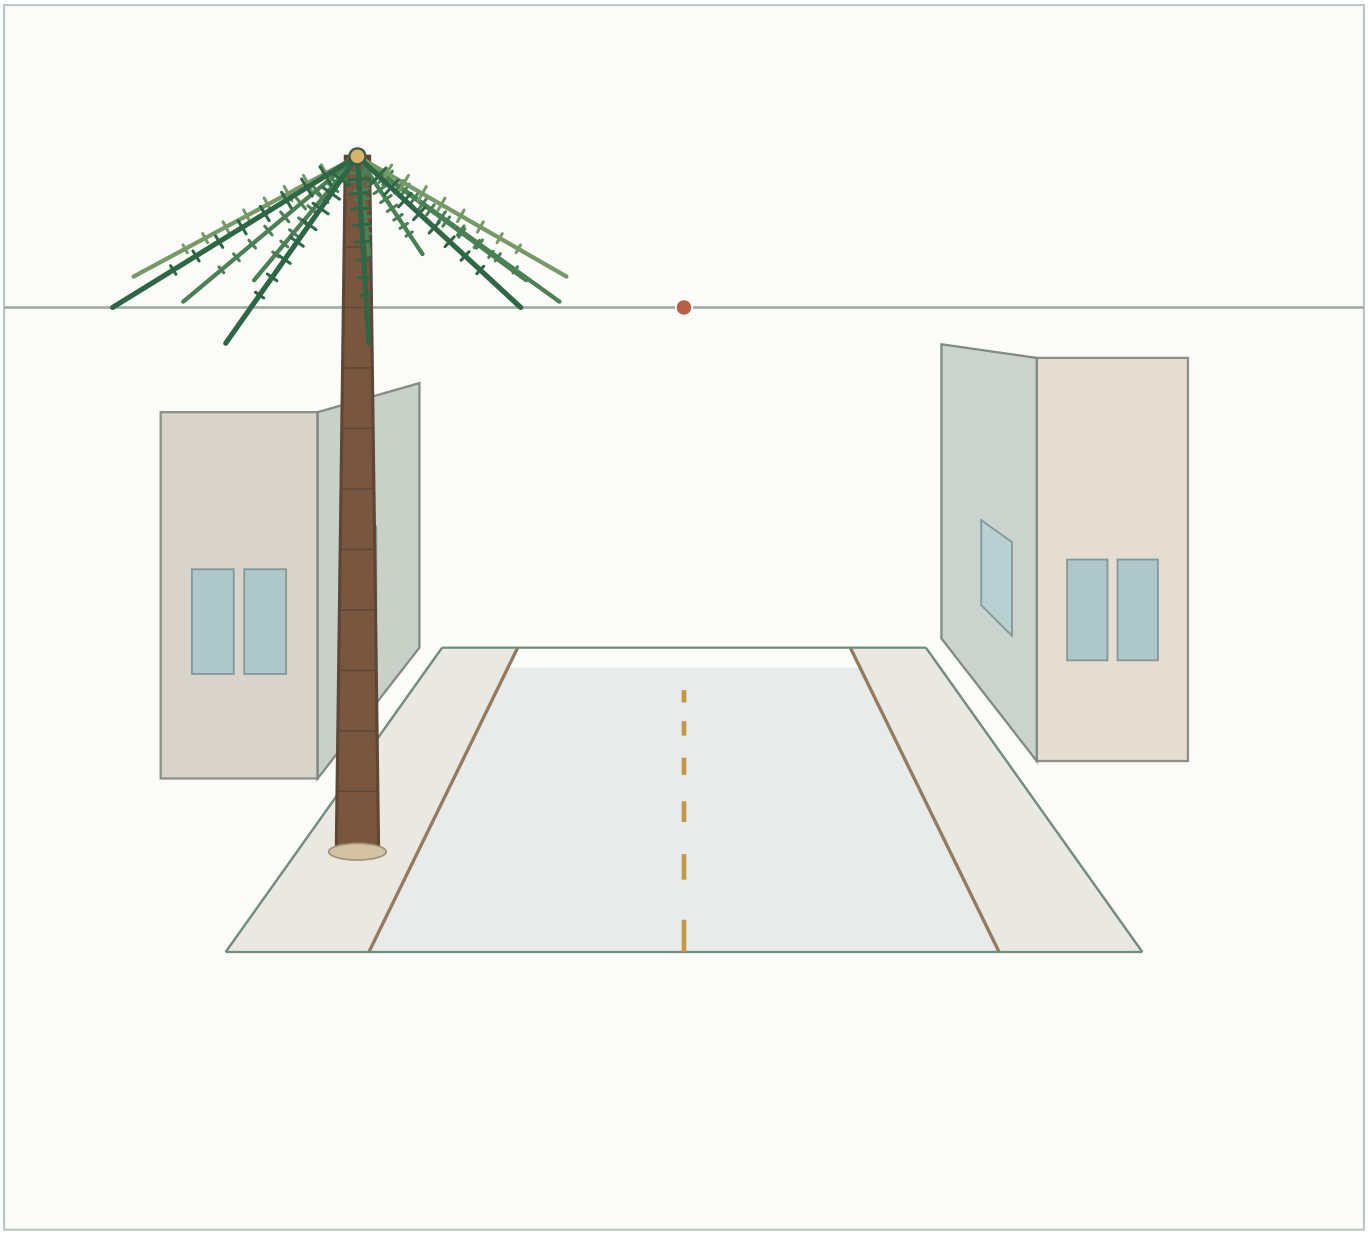
Reference | Observation reference | LETTER



Observe the street edges and the palm's place beside the road.

Draw a Palm Tree in Street Perspective

Reference | Worked construction | LETTER



Worked prompt

Draw a palm tree inside a narrowing street perspective plate using a chosen vanishing point, converging street edges, and a palm built from trunk, crown, and frond primitives.

Answer

A correct plate has a horizon line with one chosen vanishing point, two street edges converging toward it, and a palm whose tapered trunk rises from the street with fronds radiating from a crown center, nearer fronds larger than distant ones.

Reasoning

The vanishing point controls the narrowing street, and the palm's trunk and fronds are placed to follow that same depth logic so the subject reads as part of the space.

Check

Visually confirm that both street edges aim at the vanishing point and that fronds radiate consistently from the crown center with nearer fronds larger.
