Original prompt

A filled example of the strip with three era bands and one event box in each band.

Answer

Place the Great Pyramid of Khufu at about 2560 BCE in the first band. Put the first written Olympic record at 776 BCE in the second band. Put the Norman Conquest of England at 1066 CE in the third band.

Reasoning

Each date falls inside its chosen range. The marker for the Great Pyramid is approximate. Read the dates rather than the printed length of a band when comparing the events.

Check

Read the strip left to right: 2560 BCE, then 776 BCE, then 1066 CE. Each box sits inside the band whose range contains its date.
