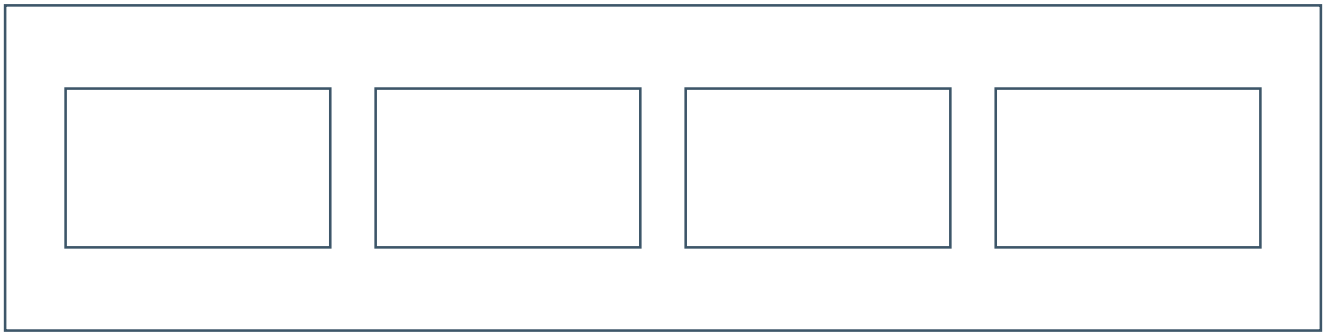
American Flag Address Labels

Answer | Task 1 of 4 | A4

Original prompt

Task 1: Sheet plan. On a blank sheet, draw a sheet outline and a label grid of four labels in a single row. Choose the label size and the gap between labels yourself and write the choices beside the drawing. Do not draw the flag motif or the text fields yet.



Chosen label: 35 × 21 mm. Equal gap: 6 mm.

Answer

A correct answer shows: a sheet outline; four label rectangles in one row; equal gaps between labels; the chosen label size and gap written beside the drawing. The four labels must be the same size and the gaps must be equal.

Reasoning

The sheet plan is the base for every later part. Equal labels and equal gaps make the cut guides and the inside-label layout repeatable across the sheet.

Check

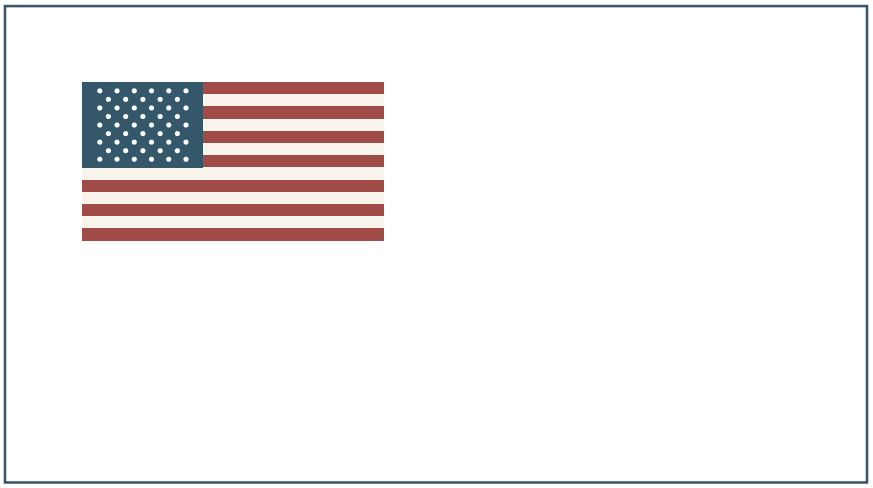
Count the labels: there must be four. Check that all four are the same size. Check that the three gaps are equal. Check that the written choices match the drawing.

American Flag Address Labels

Answer | Task 2 of 4 | A4

Original prompt

Task 2: Flag motif. Inside one label from Task 1, draw a flag motif box and fill it with a canton, stripes, and stars. Choose the canton position (upper-left or upper-right) and write the choice beside the drawing. Keep the motif inside its box.



Chosen canton: upper-left.

Answer

The sample chooses an upper-left canton. Inside the motif box, draw thirteen alternating stripes and use fifty dots for the stars, in rows of six and five. Keep the whole motif inside the label and write which corner you chose. A right-hand canton mirrors the classroom motif.

Reasoning

The motif box fixes the flag's home inside the label. The canton, stripes, and stars are the three parts of the flag motif. Keeping the motif inside its box leaves room for the text fields in Task 3.

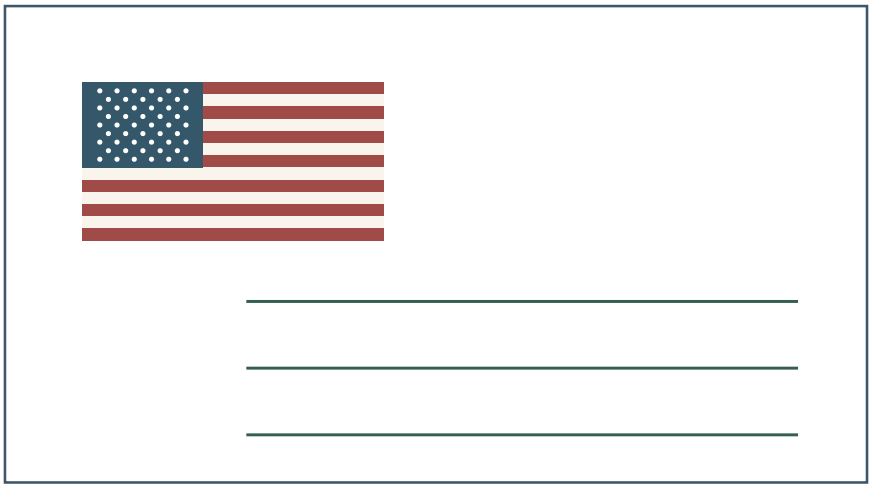
Check

Check that the canton is in the corner named in the written choice. Check that the stripes fill the rest of the motif box. Check that stars appear inside the canton. Check that the motif box sits inside the label with a visible margin.

American Flag Address Labels

Original prompt

Task 3: Address text fields. In the same label, draw address text lines in the space not used by the flag motif. Choose the number of lines (three or four) and write the choice beside the drawing. The lines must not overlap the motif.



Chosen address count: three lines.

Answer

A correct answer shows: the label from Task 2; the chosen number of text lines (three or four, matching the written choice) in the clear space; no overlap between the lines and the motif; the line count written beside the drawing. The lines must sit inside the label with a margin from the label edge.

Reasoning

The text fields are the working part of the label, so they get the clear space left by the motif. Writing the line count makes the plan checkable.

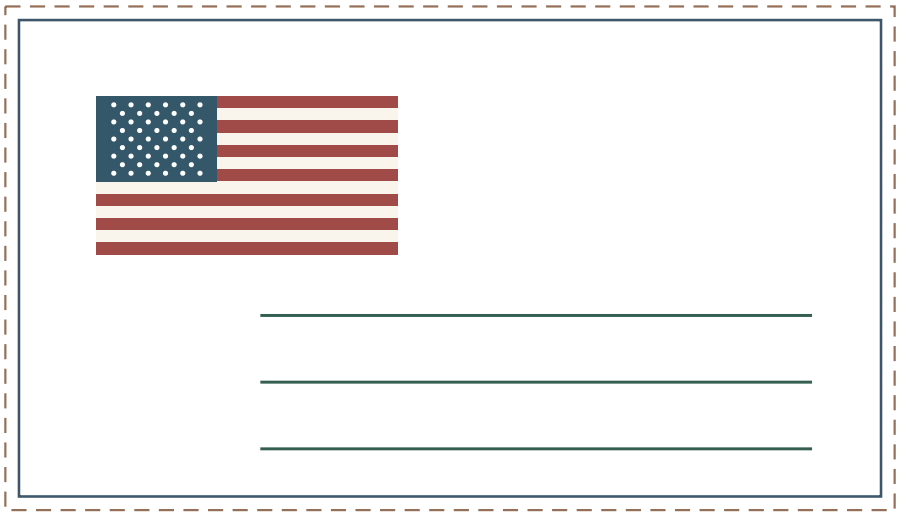
Check

Count the text lines and compare with the written choice; the two must match. Check that no line touches the motif box. Check that every line sits inside the label with a margin.

American Flag Address Labels

Original prompt

Task 4: Cut guides and full check. Around the label from Task 3, draw a cut guide. Choose the guide style (full rectangle or corner marks) and write the choice beside the drawing. Then check the whole label against the three checks from the worked example.



Upper-left canton, three address lines, full trim rectangle.

The motif and the three lines have clear space between them. All lines fit inside the label. The dashed rectangle is 1.8 mm outside every edge.

Answer

A correct answer shows: the label from Task 3; a cut guide in the chosen style outside the label with a visible gap; the guide style written beside the drawing; a short written check confirming that the motif does not touch the text lines, the text lines sit inside the label, and the cut guide sits outside the label with a gap all the way around.

Reasoning

The cut guide comes last because it follows the label edge. The written check confirms that the three parts of the label work together.

Check

Check that the guide style matches the written choice. Check that the guide sits outside the label with a gap all the way around. Read the written check and confirm each of the three points is stated.
