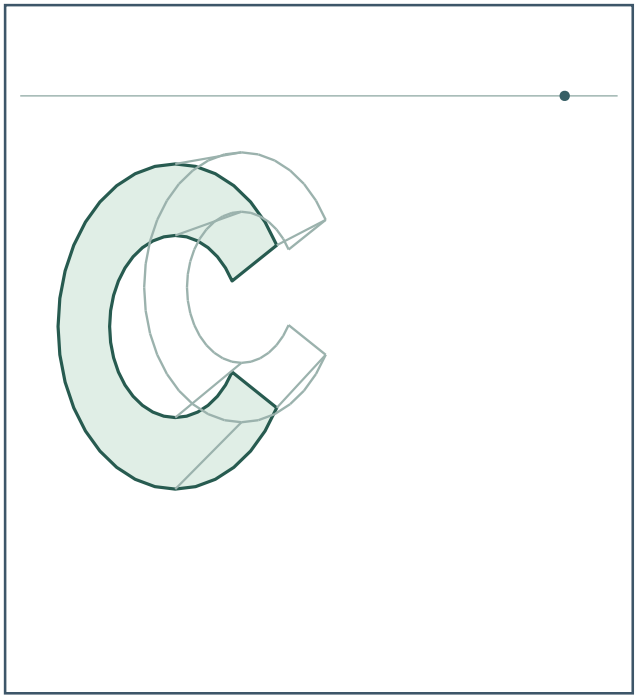
Draw Letter C in One-Point Perspective

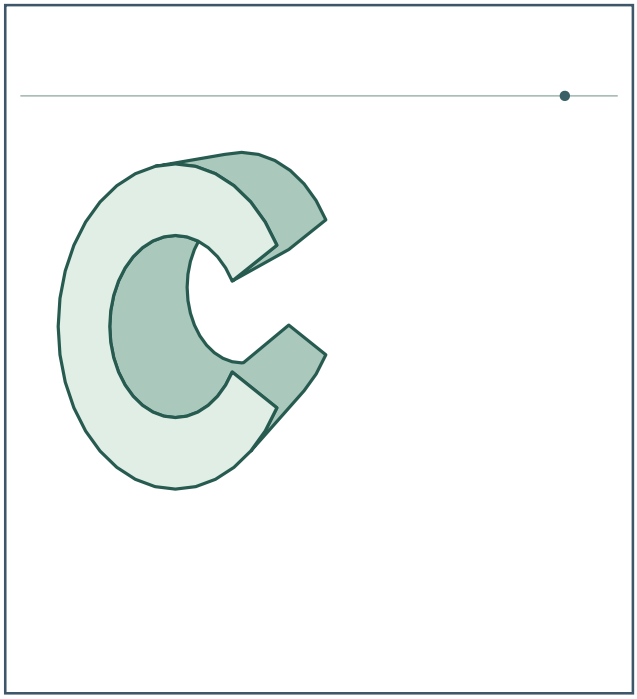
Reference | Worked example | A4

Original prompt

Construct a solid letter C in one-point perspective with the vanishing point to the upper right.



Rear opening and common depth



Clean letter C

Answer

The front C opens to the right and six faint rays lead to the upper-right point. The complete rear diagram is smaller and keeps the opening. The clean view shows the visible parts of the front and the sides.

Reasoning

The front and rear faces are parallel. The rear outline is a smaller copy placed toward the same vanishing point, and each visible lengthwise edge follows one ray.

Check

Check the opening on the two complete outlines. In the clean view, use the visible surfaces to check the slab. Extend each lengthwise edge toward the vanishing point.
