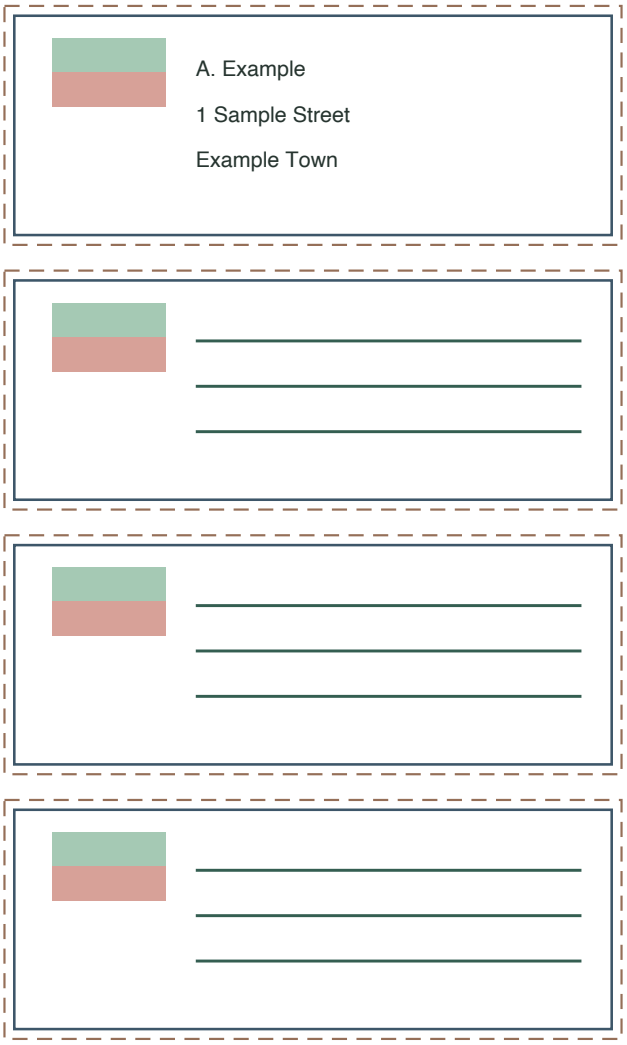
Flag Address Labels

Reference I Worked example I A4

Original prompt

Describe and sketch the worked example sheet: four labels in one column, flag at left, text field at right, top label filled with a name and two address lines, cut guides between labels.



Answer

The sheet shows four equal labels stacked vertically. Each label has a small horizontal-stripe flag on the left and a text field on the right. The top label is filled: 'A. Example', '1 Sample Street', 'Example Town'. Light cut guides separate the labels and border the sheet.

Reasoning

A single column keeps the layout simple and the cut guides easy to follow. Putting the flag left and text right keeps the address readable after cutting. Filling only the top label gives a clear model without crowding the sheet.

Check

Check that the filled text sits fully inside its field, the flag does not overlap the text, and every cut guide lies outside the label edges.

Flag Address Labels

Reference | Blank cut-out labels | A4

Cut around the light dashed guides. Write a name and two address lines inside a label. The horizontal and vertical stripe sets use separate rows.
