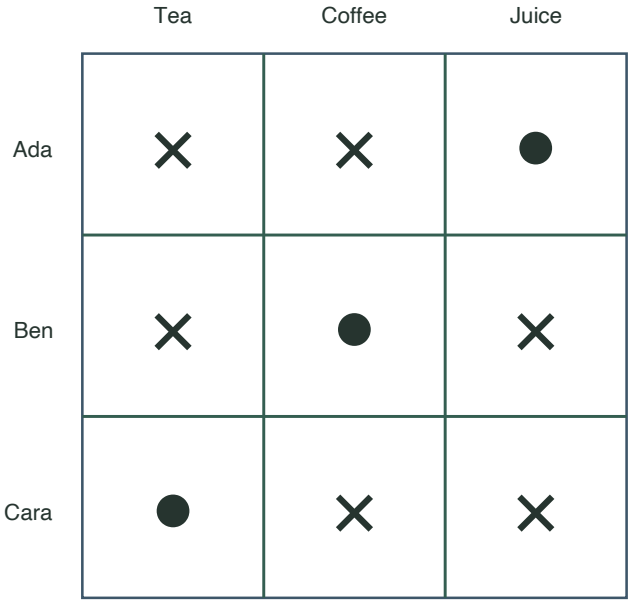
Reference I Worked example I LETTER

## Original prompt

Solve the logic grid: three people (Ada, Ben, Cara) and three drinks (tea, coffee, juice). Clues: Ada did not choose tea; Ben chose coffee; Cara did not choose coffee.



Dot = confirmed match. Cross = ruled out.

## Answer

Ada = juice, Ben = coffee, Cara = tea.

## Reasoning

Ben is fixed to coffee by clue 2. Clue 1 removes tea from Ada, and coffee is taken, so Ada is juice. Cara then takes the only remaining drink, tea. Each drink is used once and all three clues hold.

## Check

Read each clue against the final grid: Ada is not tea, Ben is coffee, Cara is not coffee. All three pass.
