Patriotic Return Address Labels

Answer | Task 1 of 4 | LETTER

Prompt

Task 1 (observe): from the reference sheet, list the order of parts on a label from top to bottom and state where the cut guide sits.

Answer

Top to bottom: star row, stripes, then three address lines. The cut guide sits in the gap outside the label edge.

Reasoning

The reference places the motif above the text and the guide in the surrounding gap.

Check

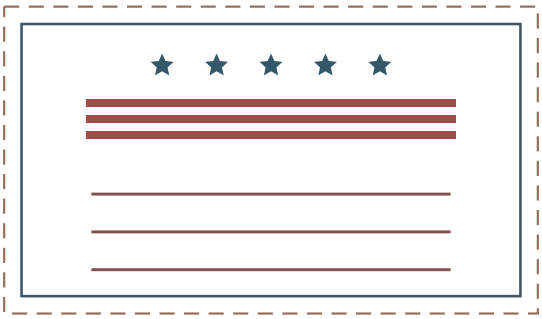

Check that your list matches the reference order and that the guide is described as outside the label.

Patriotic Return Address Labels

Answer | Task 2 of 4 | LETTER

Prompt

Task 2 (construct): draw one blank label with the star row, stripes and three ruled address lines, plus a dashed cut guide around it. Keep the reference order and do not label the parts.

Answer

A blank label sketch with a star row at the top, stripes below, three ruled text lines beneath, and a dashed guide in the gap outside the label edge.

Reasoning

Construction follows the reference order and keeps the guide outside the artwork.

Check

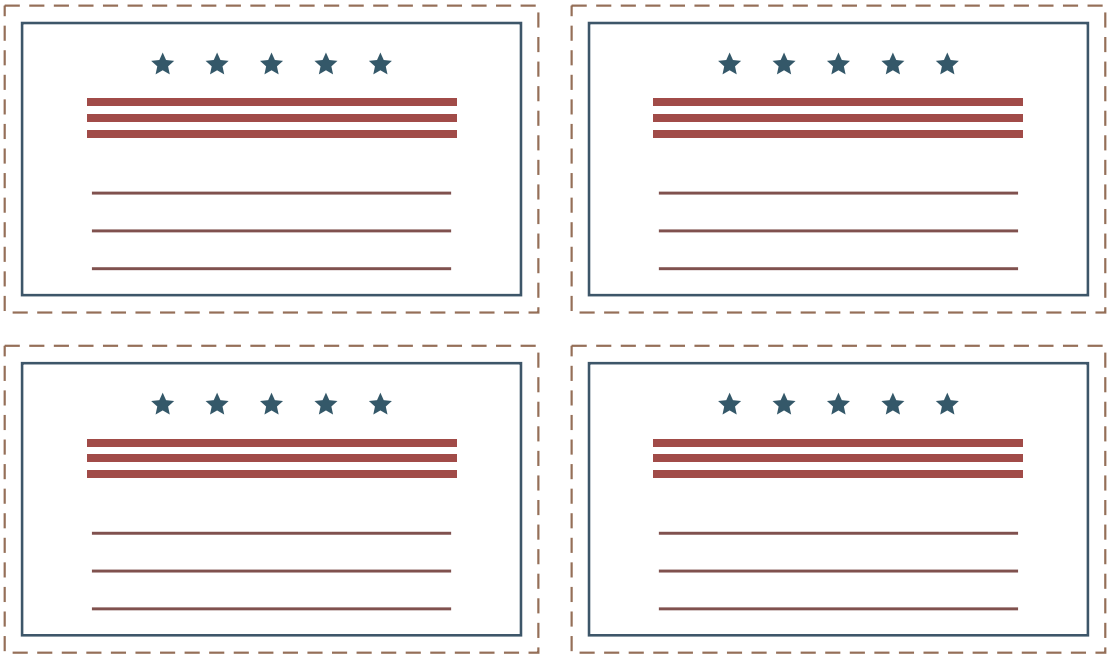

Visually compare your sketch to the reference: stars above stripes above three lines, guide outside the edge.

Patriotic Return Address Labels

Answer | Task 3 of 4 | LETTER

Prompt

Task 3 (redraw/compose): redraw a two-by-two block of labels from the reference, keeping equal gaps, and draw the cut guides between them.

Answer

Four identical labels in a two-by-two block with equal gaps, each with star row, stripes and three text lines, and dashed guides running in the gaps between labels.

Reasoning

The grid repeats one label with equal gaps, and guides follow those gaps.

Check

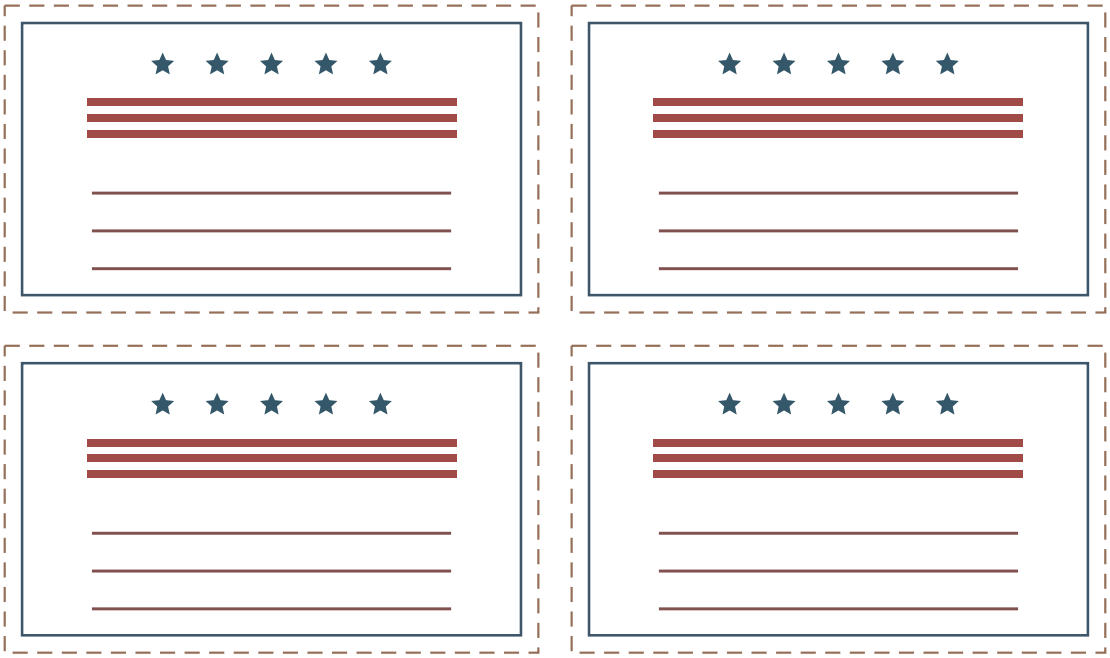

Check that all four labels match the reference and that guides lie only in the gaps, not through labels.

Patriotic Return Address Labels

Answer | Task 4 of 4 | LETTER

Prompt

Task 4 (check): a draft sheet has the cut guide drawn through the middle of each label and the stripes above the stars. Identify both errors and describe the corrected sheet.

Answer

Error one: the guide should sit in the gap outside the label, not through it. Error two: the star row belongs above the stripes. The corrected sheet has stars above stripes and dashed guides only in the gaps.

Reasoning

The reference order puts the motif above the text, and guides belong in the gaps so trimming does not cut artwork.

Check

Compare the corrected description to the reference: motif order correct and guides outside labels.
