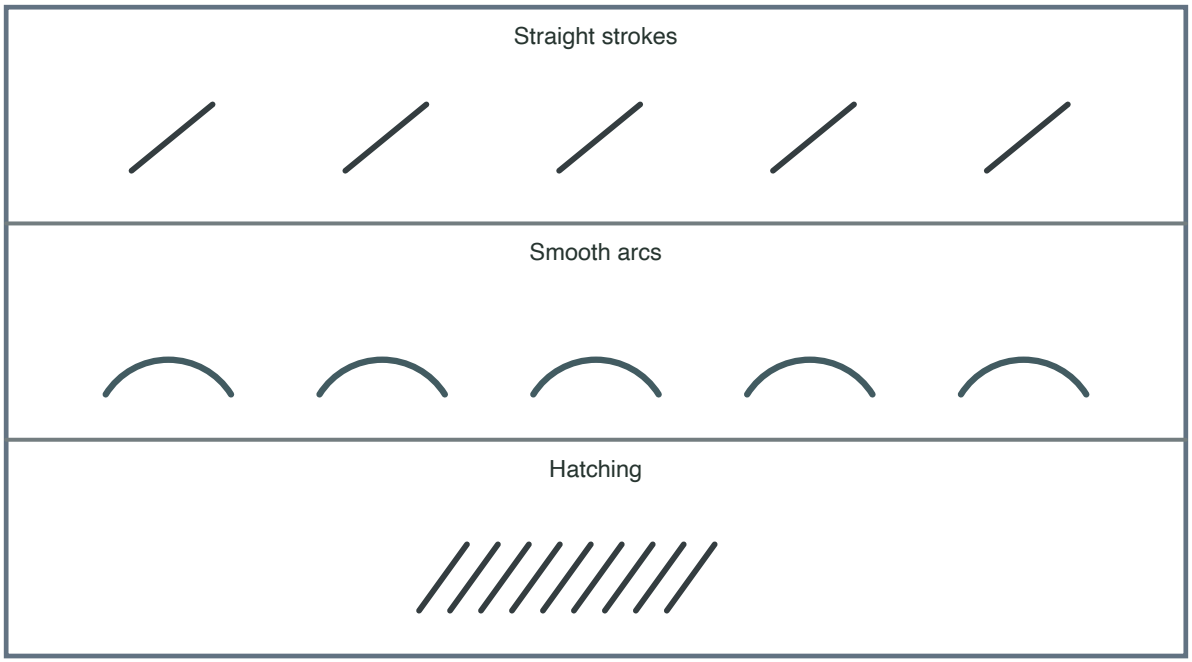
Linework Drawing Practice

Reference | Three stroke families | A4

Compare the separate examples before trying the strokes.

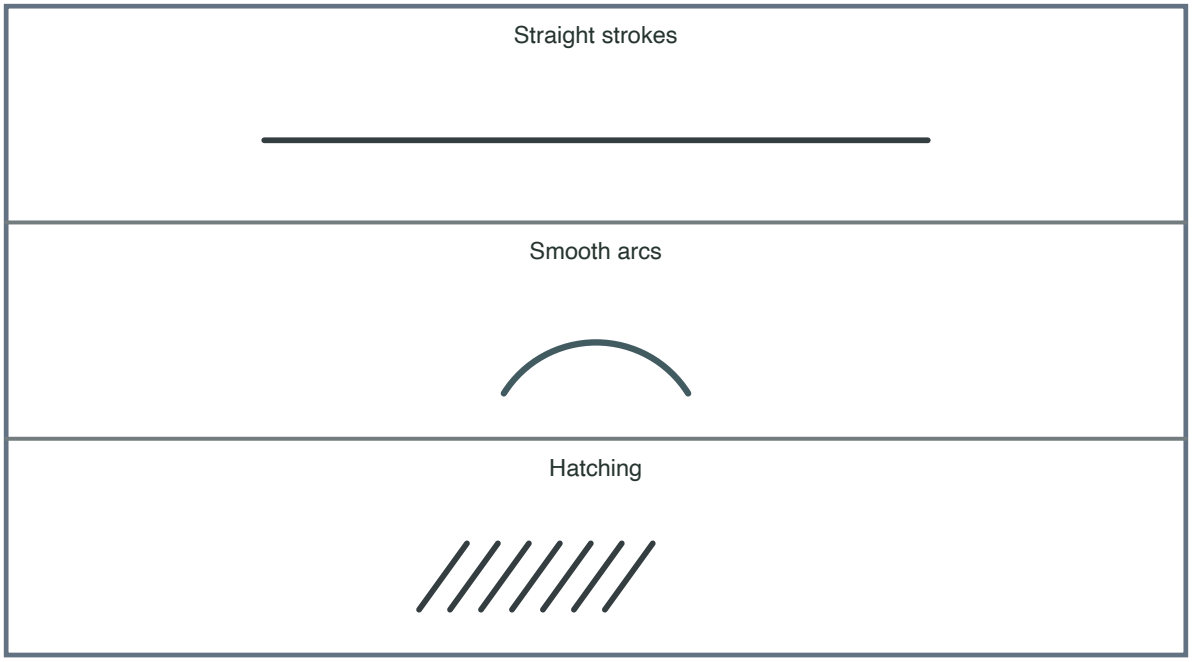


Linework Drawing Practice

Reference I Worked example I A4

Original prompt

Worked example: draw one straight stroke, one curved stroke and one short hatching set on a small plate, then check each against the reference plate.



Answer

On a small plate, draw a straight stroke across the top band, a single smooth arc in the middle band, and a short set of evenly spaced parallel strokes in the bottom band. Compare each to the reference: the straight stroke should hold one direction, the arc should have no kink, and the hatching strokes should be parallel and evenly spaced.

Reasoning

The example shows the three stroke families in separate bands so each can be judged on its own quality rather than mixed together.

Check

Look along each stroke: a straight stroke should not wander, a curved stroke should not flatten, and hatching strokes should not cross or bunch.
