Original prompt

Using the layout specification, complete the innings described in the worked example and verify the totals.

Match record

Batting team	Fielding team	Date	Venue	Innings
Team A	Team B			

Batting

Batter	Dismissal	Runs	Balls faced	Fours	Sixes
A. Patel	c Smith b Jones	42			
B. Khan	b Jones	18			
C. Rao	Run out	7			
D. Singh	Not out	25			

Bowling

Bowler	Overs	Maidens	Runs conceded	Wickets
Jones	8	2	30	2
Smith	6	1	47	0
Lee	4	0	20	0

Extras

Byes	Leg byes	Wides	No-balls	Total extras
3	2	4	1	10

Innings totals

Total runs	Team wickets	Total overs
102	3	18

Answer

Batting rows: Patel 42, Khan 18, Rao 7, Singh 25 not out. Bowling rows: Jones 8-2-30-2, Smith 6-1-47-0, Lee 4-0-20-0. Extras: byes 3, leg byes 2, wides 4, no-balls 1, total 10. The innings records 102 runs, 3 team wickets and 18 overs. The bowlers conceded 97 runs and received credit for 2 wickets.

Reasoning

Add the batting runs and all four extras for 102. In this example without separate penalty runs, add the two types of bye to the bowling figures for the same total. Jones took two credited wickets; Rao's run-out is the third team wicket. The three bowling spell lengths sum to 18 whole overs.

Check

Add 42 + 18 + 7 + 25 = 92 and 3 + 2 + 4 + 1 = 10. Check 92 + 10 = 102 and 30 + 47 + 20 + 3 + 2 = 102. Compare three team wickets with two bowler wickets and one run-out.
