

A wider downward parabola

Use the vertex and a five-point table to sketch a smooth parabola. The plotted curve is not a chain of straight chords.

$y = -1/2(x - 1)^2 + 2$. Table x values: -1, 0, 1, 2, 3. Every interval is 1 unit.

1. Locate the vertex and symmetry line. _____
2. Calculate and plot the five table points. _____
3. State direction and vertex type. _____
