

Letter and A4: choose before printing

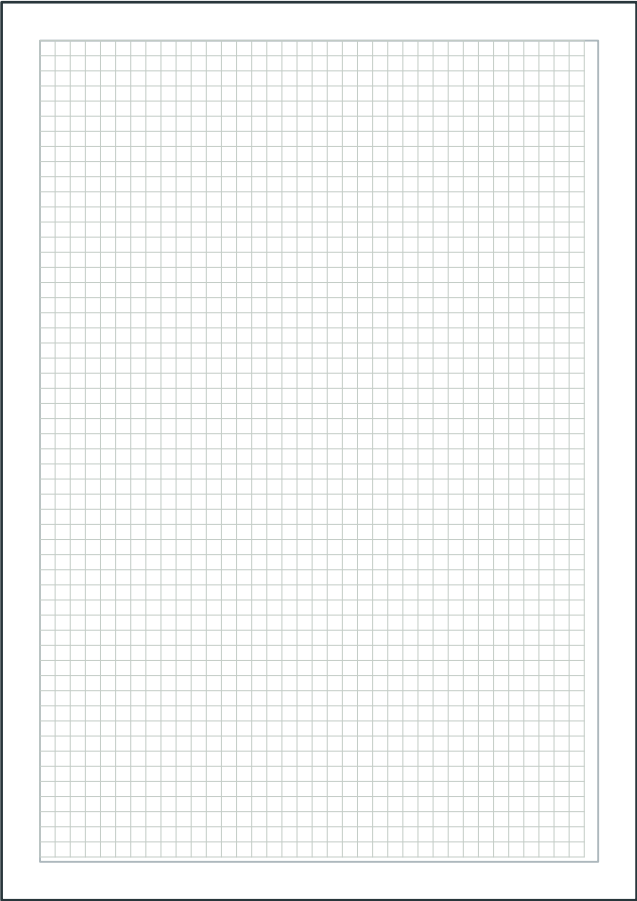

Compare paper dimensions, not the size of a browser preview. The drawings below are at 40% scale. Choose the PDF and printer tray matching the physical paper.

LETTER

215.9 x 279.4 mm

A4

210 x 297 mm

A4 is taller, Letter is wider. The same paper-grid spacing can fit a different number of complete cells. Margin assumptions describe this exercise, not every printer. Use the matched paper file rather than Fit if size matters.

Both sheets retain the same mathematical 5 mm grid spacing when generated at full size. These reduced diagrams do not. No physical print test has been performed; calibrate an actual print separately.
