

A fictional set of art cards

Fictional parts of one whole. Sector angle = count / total x 360 degrees. The supplied completion begins on the right and goes counterclockwise.

Counts: A Lines=4, B Forms=6, C Color=7, D Space=3

1. Find the total count. Compare the completed plot.
2. Calculate each percentage and sector angle. Compare the completed plot.
3. Check the two whole-chart totals. Compare the completed plot.
