

A made-up club activity split

Fictional parts of one whole. Sector angle = $\text{count} / \text{total} \times 360$ degrees. The supplied completion begins on the right and goes counterclockwise.

Counts: A Sketch=6, B Build=3, C Read=3

1. Find the total count. 12 items.
2. Calculate each percentage and sector angle. A: 50%, 180 deg; B: 25%, 90 deg; C: 25%, 90 deg
3. Check the two whole-chart totals. Percentages total 100%; angles total 360 degrees.
