

Check your print scale

Print the PDF at Actual size / 100%. Measure the paper with a real ruler.

100 mm horizontal

4 in = 101.6 mm

Both axes matter. Unequal horizontal and vertical errors indicate distortion, not just uniform scaling.

100 mm
vertical

RECORD YOUR RESULT

Bar	Measured	Difference
100 mm horizontal		
100 mm vertical		
4 in / 101.6 mm		

Record printer, paper size, viewer and scale setting. File geometry checks do not replace a physical print check.
