

Projection placement: six checks

1. Third angle: where is the top view?

2. First angle: where is the top view?

3. Third angle: where is the right-side view?

4. First angle: where is the right-side view?

5. A top view is below front and right-side view is at left. Which method?

6. Does switching the method turn the right-side view into the left-side view?
