

Projection placement: six checks

1. Third angle: where is the top view?

Above the front view.

2. First angle: where is the top view?

Below the front view.

3. Third angle: where is the right-side view?

To the right of the front view.

4. First angle: where is the right-side view?

To the left of the front view.

5. A top view is below front and right-side view is at left. Which method?

First-angle projection.

6. Does switching the method turn the right-side view into the left-side view?

No. Viewing direction and view name remain the same; placement changes.
