

Reflect over y-axis

Plot the original point set, then apply the stated sign change. Join corresponding vertices in the same order.

Original points: $[-4, -2]$, $[-2, 2]$, $[1, 3]$, $[3, -1]$; reflect over y axis.

1. State the reflected coordinates. _____
2. Which points remain on an axis? _____
3. Connect corresponding vertices. _____

Original practice data / coordinate units, not ruler measurements / physical printing not tested
