

No clear straight-line trend

Original fictional paired data. Plot each ordered pair once. Keep points unconnected; this exercise does not ask for a fitted line.

Pairs (input, score): (1, 5), (2, 2), (3, 8), (4, 4), (5, 7), (6, 3), (7, 6), (8, 5)

1. How many pairs? State the third pair. Compare the completed plot.
2. Describe the overall linear pattern. Compare the completed plot.
3. Does this plot prove a causal link? Compare the completed plot.
