

## Positive intercepts

Find each intercept by setting the other variable to zero. Plot both intercepts and draw the line through them.

$$2x + (3)y = 12.$$

1. Find x- and y-intercepts. \_\_\_\_\_
2. Copy the standard-form equation. \_\_\_\_\_
3. Draw the line through valid points. \_\_\_\_\_

Original practice data / coordinate units, not ruler measurements / physical printing not tested
