

A 10-minute drawing warm-up

An optional routine: shorten, repeat or pause a section as needed. The reference shows geometric targets; assess your own line placement and consistency.

01. Targeted lines / 2 minutes

02. Arcs / 2 minutes

03. Ellipse loops / 3 minutes

04. Simple boxes / 3 minutes

Self-check: endpoint overshoot; curve wobble; ellipse balance; box edge families. Record one observation, not a score or promise of progress.
