Diary Page Layout: Dated Header, Ruled Entry, and Margin

Worked example / complete source key

On a hypothetical 20 cm by 28 cm sheet, use a 1 cm frame on all sides and a 3.5 cm left margin. Find the inner area and the writing width, then state the line count for 7 mm spacing if lines run the full inner height.

Answer: Inner width: 20 − 2 = 18 cm. Inner height: 28 − 2 = 26 cm. Writing width: 18 − 3.5 = 14.5 cm. For 7 mm spacing over 26 cm, 260 mm ÷ 7 mm ≈ 37 intervals, so about 38 line positions if the first line sits at the top of the ruled area. These are example inputs only; measure your own sheet and equipment.
