Lined Paper with a Picture Box: Planning a Caption Sheet

Chosen reference / caption

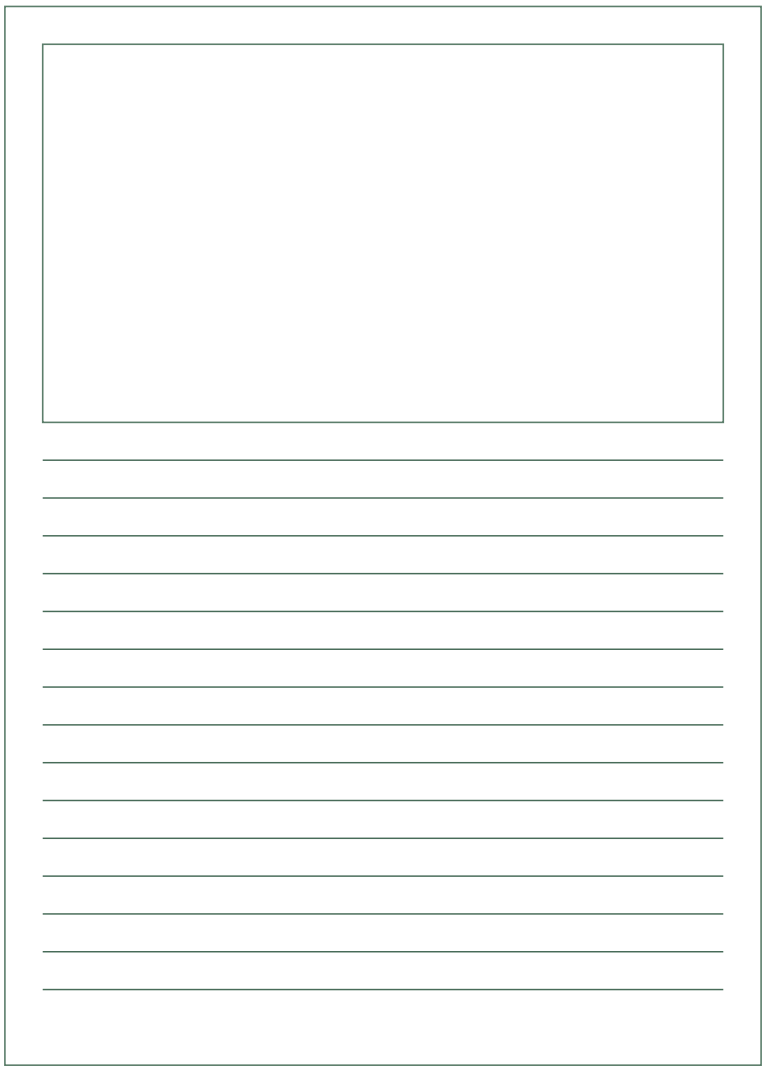

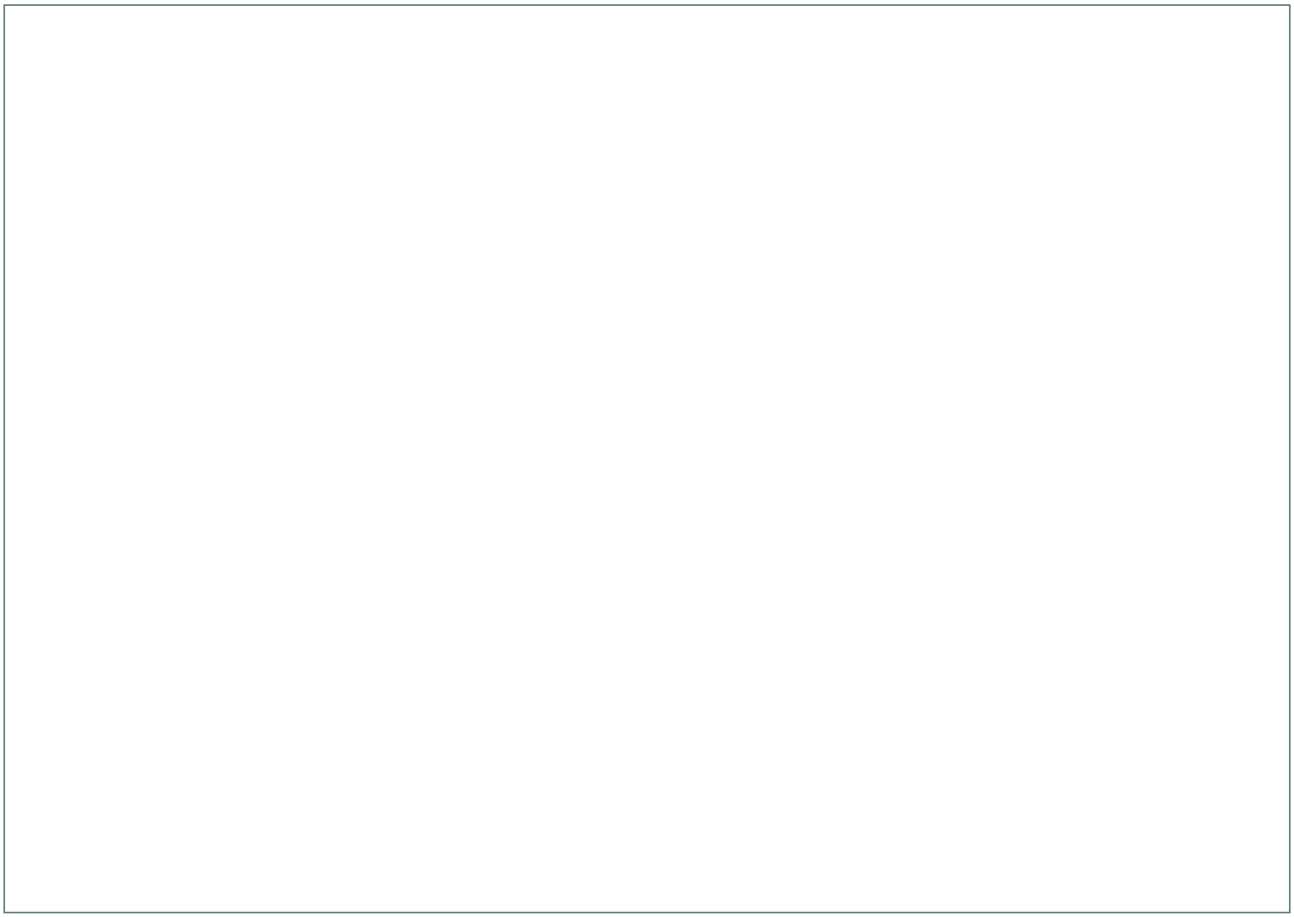

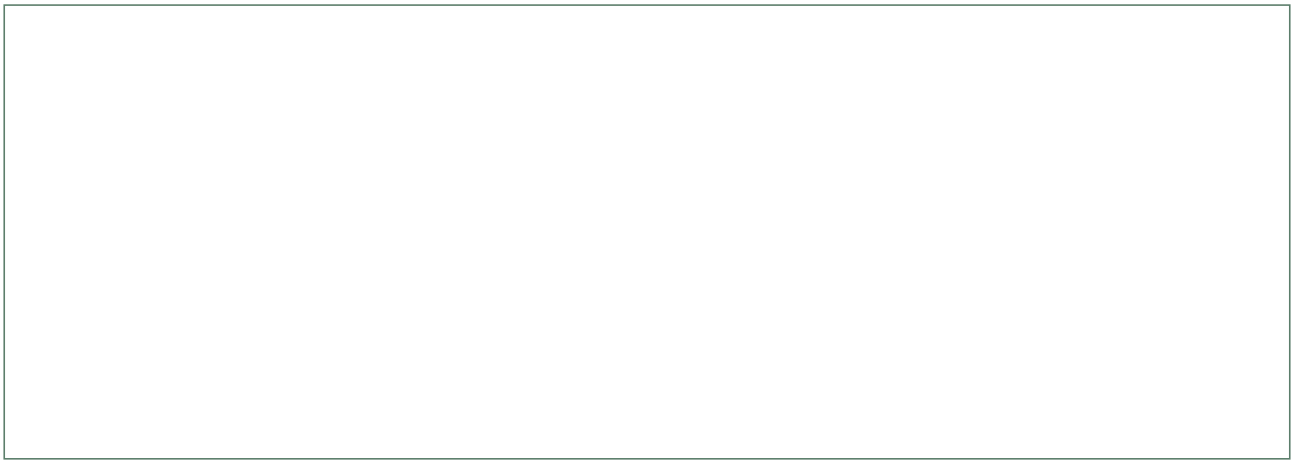

Diagram at 1:2 of the hypothetical 200 x 280 mm sheet: picture height 100 mm, gap 10 mm, and 15 caption rows at 10 mm. These are source dimensions, not reduced-diagram measurements.

Lined Paper with a Picture Box: Planning a Caption Sheet

Original worked example / unchanged complete key

Prompt: A hypothetical sheet is 200 mm wide and 280 mm tall. Margins are 10 mm on each side. The picture box is 100 mm tall, and a 10 mm gap sits below it. Line spacing is 10 mm. How many caption lines fit?

Answer: Usable height is 280 minus 20 (top and bottom margins) = 260 mm. Subtract the 100 mm box and the 10 mm gap: 260 minus 110 = 150 mm for caption lines. At 10 mm spacing, 150 divided by 10 = 15 lines. This is arithmetic for the stated hypothetical inputs only; measure your own sheet and spacing before using any count.
