Chosen reference / grid notes

120 x 180 mm character field + 20 mm right notes column.

12 columns x 18 rows = 216 cells. Total width: 120 + 20 = 140 mm; height: 180 mm. No characters are prefilled.

Genko Yoshi Manuscript Grid: Square Cells and Margin Notes

Original worked example / unchanged complete key

Prompt: A page has usable width 140 mm and usable height 180 mm. Use 10 mm square cells and a 20 mm right note column. Find columns, rows, and total character cells.

Answer: Character field width is 140 minus 20 equals 120 mm. Columns: 120 divided by 10 equals 12. Rows: 180 divided by 10 equals 18. Total cells: 12 times 18 equals 216. Check: 12 times 10 plus 20 equals 140 mm, and 18 times 10 equals 180 mm. These inputs are hypothetical; measure your own paper.
