Greek Alphabet Chart with Letterforms, Names and Tracing Rows

Original tasks 1, 2 / independent work

Task 1

Produce the chart row for the first five Greek letters (alpha through epsilon): give each uppercase and lowercase form, its name, and an approximate pronunciation tied to one named reference.

Task 2

Plan a tracing row for a letter whose descender is confirmed in the chosen model, and state the guide-line layout you use.

Greek Alphabet Chart with Letterforms, Names and Tracing Rows

Original tasks 3, 4 / independent work

Task 3

State how the chart should handle beta pronunciation, and name the reference you would use.

Task 4

Design a self-check for a tracing row of lowercase omicron in the chosen model, using a rubric rather than an exact answer.
