Numbered Ruled Paper: Reference Lines Without Pleading-Paper Conventions

Sketch worksheet: variant, convention, column start/width, header placement

Student sketch grid with fields; practice values and reasons left empty.

Variant choice (fully numbered / every-fifth-line)	
Numbering convention (line 1 / line 0)	
Number-column start position (mm)	
Number-column width (mm)	
Header field placement	

Numbered Ruled Paper: Reference Lines Without Pleading-Paper Conventions

Original tasks 1, 2, 3 / blank responses

Task 1

A sheet starts numbering at line 1. What is the second row after row 20?

Task 2

Your printer cannot print within 8 mm of the left edge. You want a number column 10 mm wide. What is the earliest start position that keeps the whole column inside the printable area?

Task 3

A second-page variant labels only rows 5, 10, 15, and 20. A reader wants the second row after the row labeled 10. Which row is meant?

Numbered Ruled Paper: Reference Lines Without Pleading-Paper Conventions

Original tasks 4 / blank responses

Task 4

Sketch a plan for a numbered ruled sheet. State whether it uses the fully numbered variant or the every-fifth-line variant, state the numbering convention (line 1 or line 0 for the first ruled row), and show the header field and number column with a stated start position and width.
