Fancy Lined Paper Printable: Design an Ornate Ruled Stationery Sheet

Worked example / complete source key

Plan a ruled writing area on a page 210 mm tall using 8 mm line spacing and 18 lines, with equal top and bottom margins.

Answer: The ruled block is 8 mm times 18 lines, which equals 144 mm. Subtracting 144 mm from 210 mm leaves 66 mm for both margins together, so each margin is 33 mm. The first ruled line sits 33 mm from the top edge and the last sits 33 mm from the bottom edge. The frame must stay outside those limits, and the plan should state the spacing and line count explicitly so the layout can be checked independently.
