Kindergarten Draw-and-Label Sheet: Picture Box with Sentence Lines

Original worked example / unchanged complete key

Prompt: A child draws a red ball in the picture box. The child writes the label ball on one label line and the sentence The ball is red on the sentence lines. Check the label and sentence using the convention.

Answer: The label ball has four letters. The letters a and l are checked: a sits between baseline and midline, and l rises above the midline. The sentence has four words and relates to the drawing. The check method is to count the labels (one), count the words in the sentence (four), and check two small letters for placement between baseline and midline. The child's letter style is accepted because the placement is consistent and readable.
