Feint Lined Graph Paper: Hybrid Ruling for Neat Handwriting and Alignment

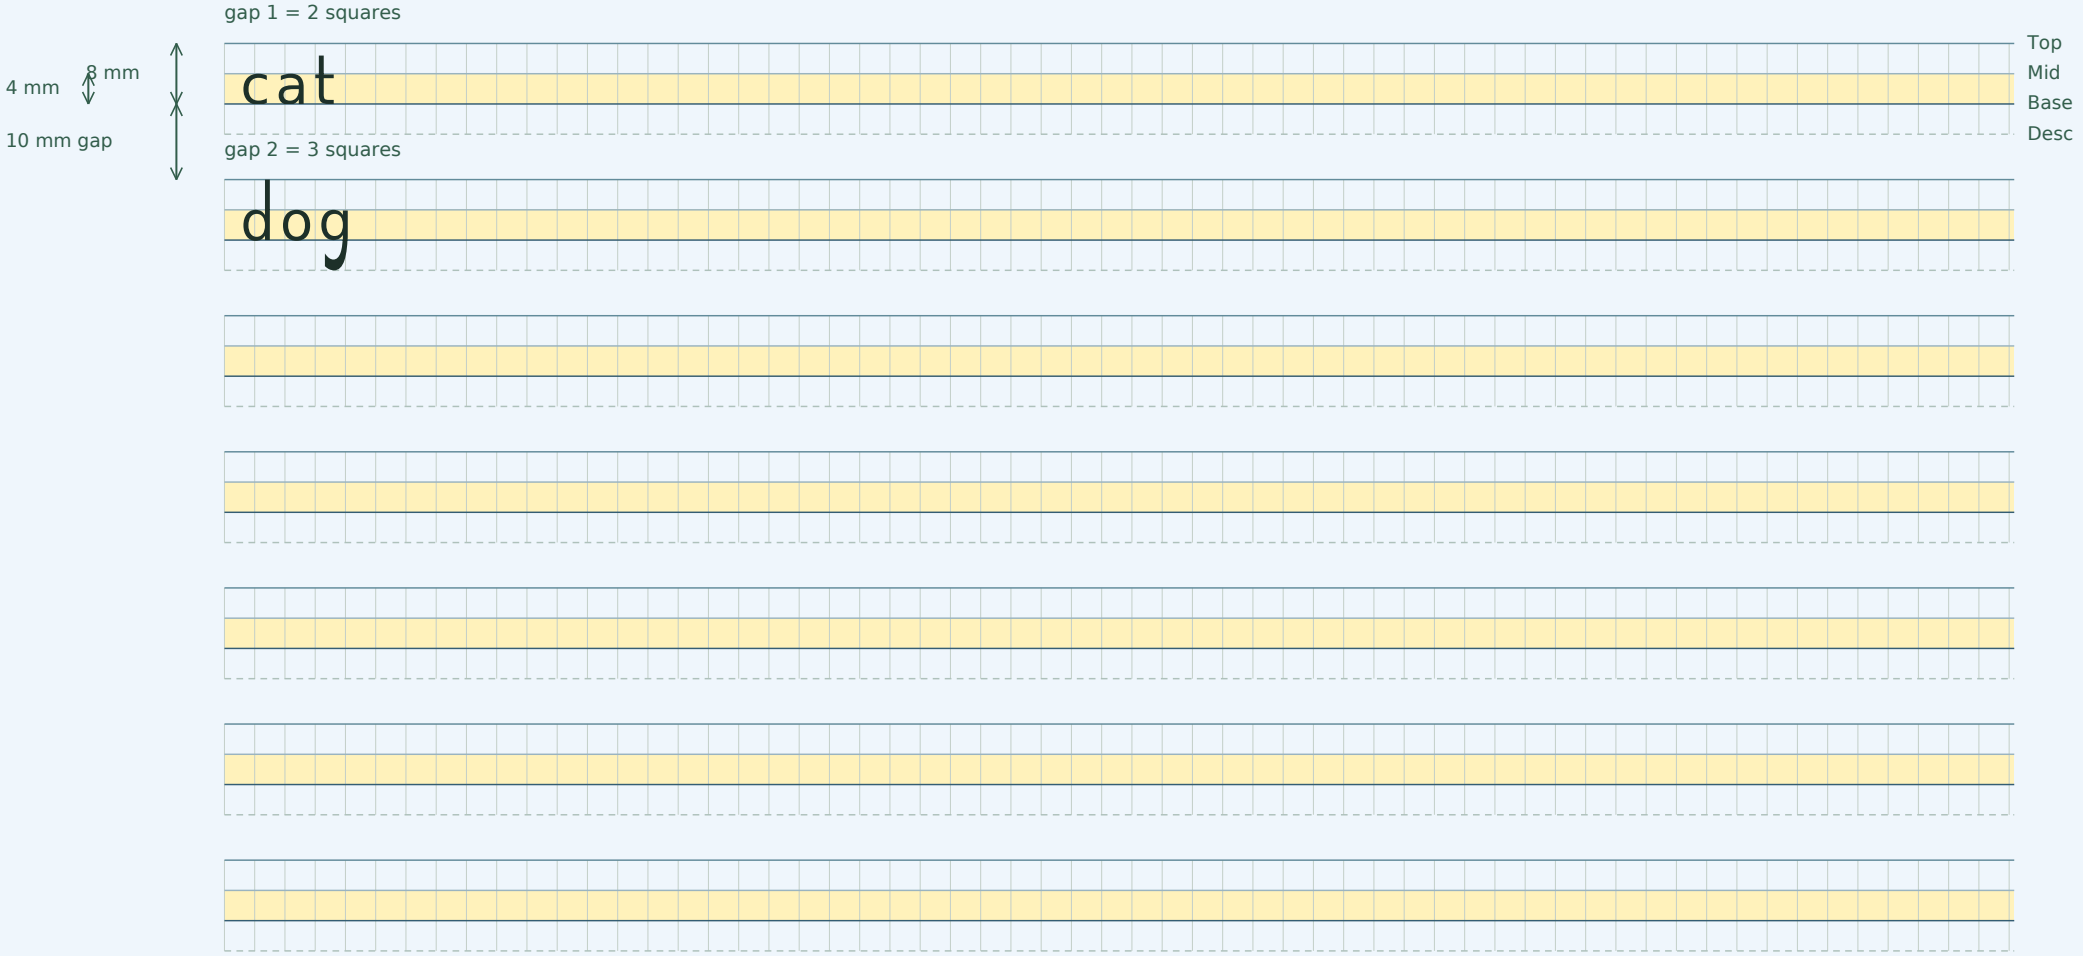

Diagram 1: Baseline, midline, and the x-height zone

Baseline on the lower feint line; midline 8 mm above it; x-height zone spans two 4 mm grid squares. Ascenders/descenders follow the chosen style.

Feint Lined Graph Paper: Hybrid Ruling for Neat Handwriting and Alignment

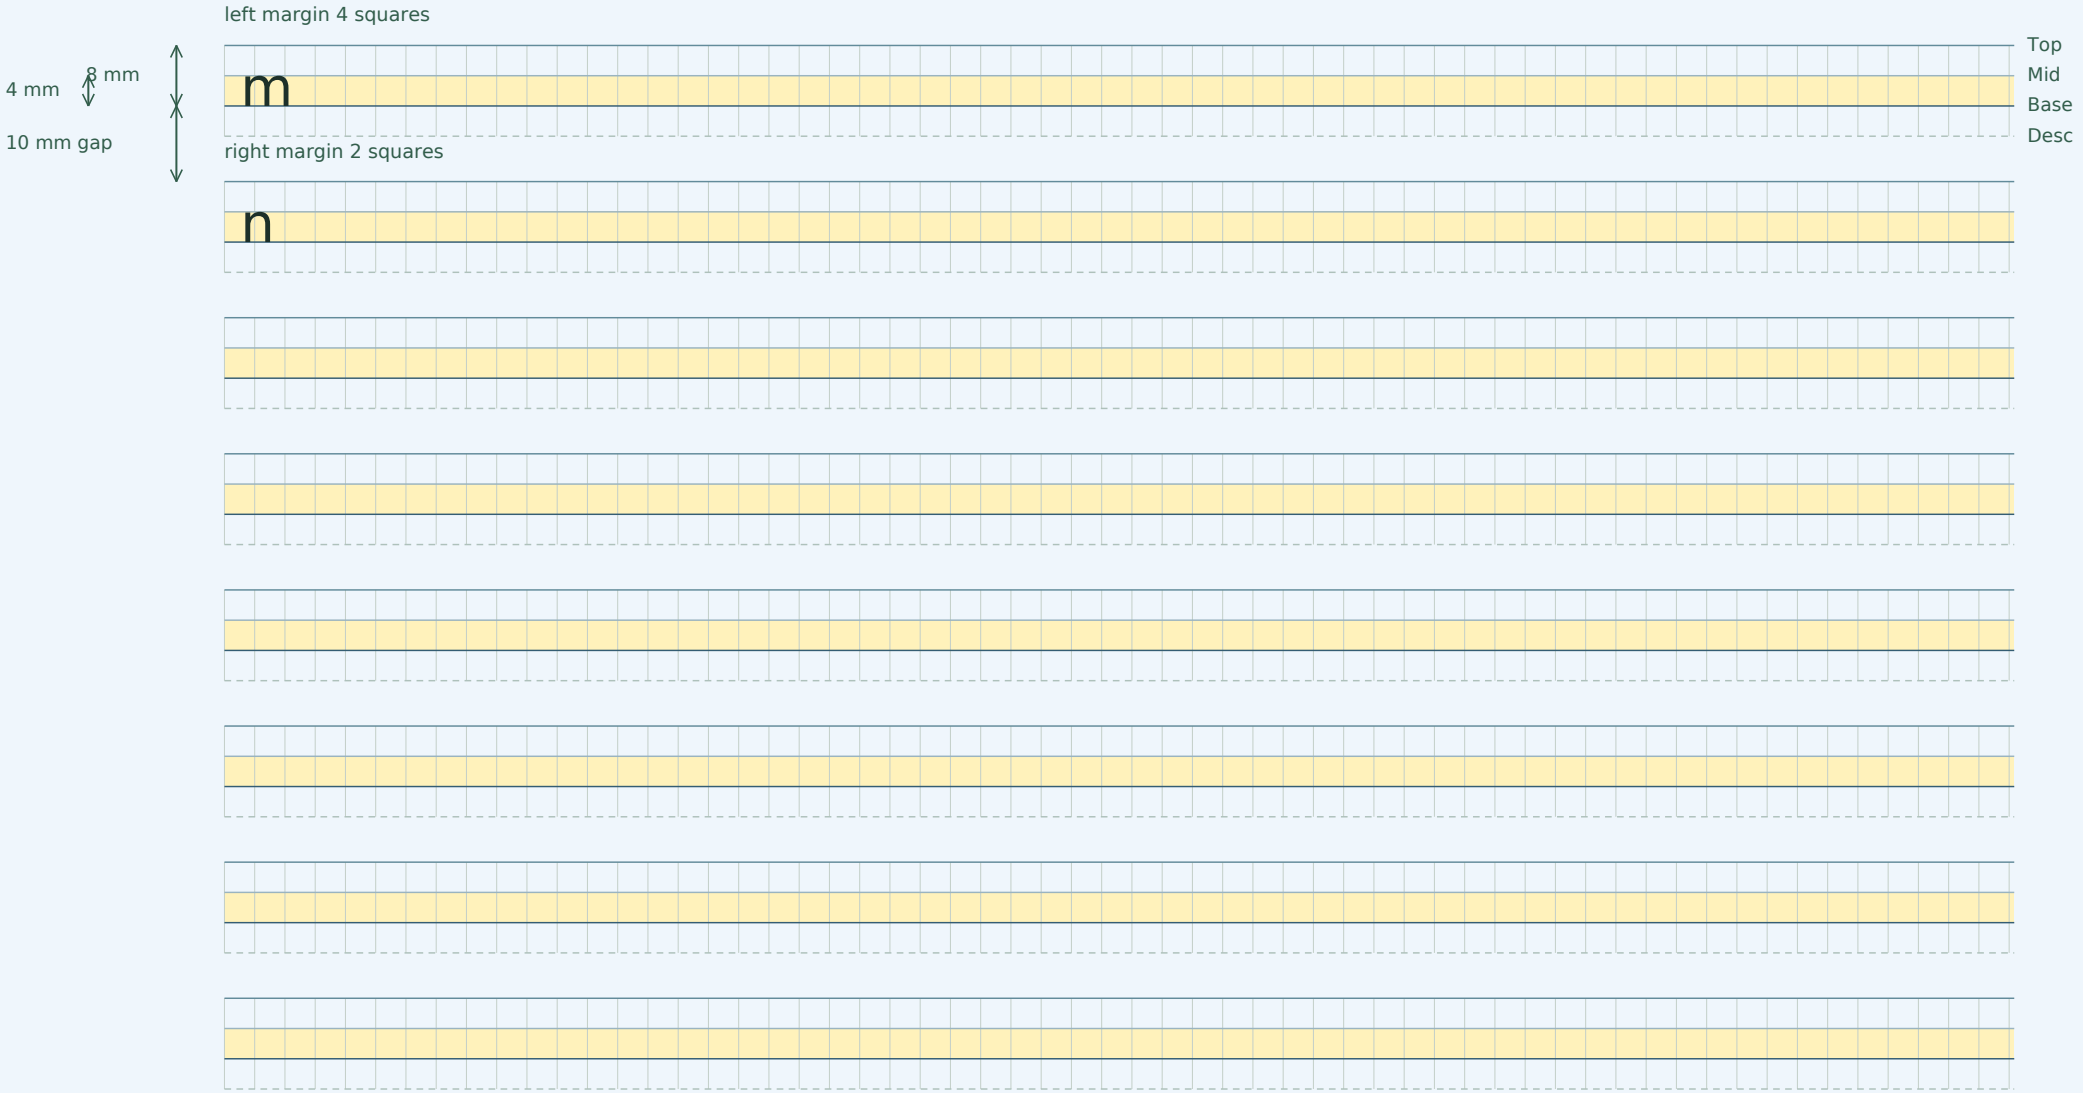

Diagram 2: Two word gaps measured in grid squares

Two word gaps on one line: first gap two grid squares, second gap three grid squares. Compare adjacent gaps; a one-square difference is the checkable threshold in this hypothetical example.

Diagram 3: Margin check by counting grid squares

Count grid squares from each page edge to the first and last letters. Planned 3 left / 3 right; actual 4 left / 2 right. Note the difference in squares and state one correction.
