Original tasks 1, 2, 3 / blank responses

Task 1

On a grid with 4 mm squares, use this simplified exercise convention: each letter occupies one whole cell and each word gap is one empty cell. Plan 'a man sat', beginning at cell 1. State each word's starting cell.

Task 2

A student writes 'we go' but the gap between the words is two empty cells while the rest of the sentence uses one-cell gaps. Describe the correction and the check.

Task 3

On a grid with 6 mm squares, a writer chooses a two-square x-height and a two-cell word gap. Write a three-word sentence and state the cell span of each word, beginning at cell 1.

Graph Paper Sentences: Grid Spacing Guides for Neat Handwriting

Original tasks 4 / blank responses

Task 4

Copy the model sentence 'we can sit' onto a blank grid row. After copying, you find that 'sit' starts one cell later than in the model. Describe how to adjust the next copy and how to check it.
