Japanese Character Practice Grid: Stroke-Order Boxes and Repeat Rows

Worked example / complete source key

A hypothetical sheet has a 25 mm margin, a 35 mm stroke-order box, and three repeat cells of 18 mm each. The measured usable width is 140 mm. Does the row fit, and by how much?

Answer: The row width is 25 + 35 + 3×18 = 25 + 35 + 54 = 114 mm. It fits within 140 mm, leaving 140 − 114 = 26 mm of spare width.
