Kana Practice on Square Grids with Stroke Boxes

Worked example / complete source key

A stroke box is 12 mm tall with the midline at 6 mm. A horizontal stroke starts at the left edge and ends 3 mm above the midline. Where does it end in millimetres from the baseline, and how far is it from the top of the stroke box?

Answer: It ends at 6 + 3 = 9 mm from the baseline. The top of the stroke box is at 12 mm, so it is 12 - 9 = 3 mm from the top.
