Name-Tracing Rows with Illustration Boxes: A Drawing and Writing Worksheet Plan

Worked example / complete source key

A page has four tracing rows, each a hypothetical 18 mm high, and one drawing box row a hypothetical 30 mm high. The measured usable page height is 120 mm. Does the content fit, and by how much?

Answer: The tracing block is 4 times 18 mm equals 72 mm. Adding the 30 mm box row gives 102 mm total. The measured usable height is 120 mm, so the content fits with 18 mm remaining. Both values are hypothetical examples until measured on the actual equipment.
