Name-Tracing Rows with Illustration Boxes: A Drawing and Writing Worksheet Plan

Original tasks 1, 2 / independent work

Task 1

A page has three tracing rows, each a hypothetical 20 mm high, and one drawing box row a hypothetical 25 mm high. The measured usable page height is 100 mm. Calculate the total content height and state whether it fits.

Task 2

A child traces a name but writes all letters at the same height, ignoring the midline. Using the rubric, which criterion is most affected, and what is one valid next step?

Name-Tracing Rows with Illustration Boxes: A Drawing and Writing Worksheet Plan

Original tasks 3, 4 / independent work

Task 3

A drawing box is a hypothetical 30 mm square. A child draws one long line that crosses the box edge. Using the rubric, score box fit and mark count, and suggest one adjustment.

Task 4

A page uses a printed model name in row one and a cursive model in row two. A child copies row one in cursive. Is this a rubric error or a valid alternative? Explain using the convention.
