Phoneme-Grapheme Mapping Boxes: Sound-to-Spelling Practice

Dictation Word List and Grapheme-Count Column

Dictation list ordered simple to complex: cat, dog, sun, map, ship, thin, rain, night. Each row has empty sound boxes and an empty grapheme-count answer column.

Word	Sound Boxes	Grapheme Count
cat		
dog		
sun		
map		
ship		
thin		
rain		
night		

Phoneme-Grapheme Mapping Boxes: Sound-to-Spelling Practice

Convention and Legibility Note

States the one-grapheme-per-box convention and the legibility allowance.

Convention: each box holds exactly one grapheme. A grapheme may be one letter or a fixed multi-letter group such as sh, th, ai, or igh.

Legibility: any legible form that clearly represents the intended grapheme is accepted. Printed or handwritten styles, joined or separated multi-letter graphemes, and varied x-height are accepted.

Grapheme-count column: after writing a row, count the graphemes actually written and record that number. Compare it with the box count.

Phoneme-Grapheme Mapping Boxes: Sound-to-Spelling Practice

Original tasks 1, 2, 3 / blank responses

Task 1

Map the spoken word 'ship'. Segment it, state the number of boxes, write one grapheme per box, and give the grapheme count.

Task 2

Map the spoken word 'rain'. Segment it, state the number of boxes, write one grapheme per box, and give the grapheme count.

Task 3

Map the spoken word 'night'. Segment it, state the number of boxes, write one grapheme per box, and give the grapheme count.

Phoneme-Grapheme Mapping Boxes: Sound-to-Spelling Practice

Original tasks 4 / blank responses

Task 4

Map the spoken word 'cat'. Segment it, state the number of boxes, write one grapheme per box, and give the grapheme count.
