Finger-Space Ruler Strip: A Cut-Out Word-Spacing Tool

Worked example / complete source key

A student writes 'We can go.' with gaps of 1.0 cm, 2.4 cm, and 1.8 cm. The gauge band is 1.5 cm to 2.0 cm. Which gaps fit, and what is one valid adjustment?

Answer: The 1.8 cm gap fits. The 1.0 cm gap is too narrow and the 2.4 cm gap is too wide. One valid adjustment is to widen the first gap to 1.6 cm and narrow the second gap to 1.9 cm, so all gaps fit the band.
