Lowercase Letter Gap Strips: Cut-and-Paste Missing Letters

Worked example / complete source key

A strip shows the letters a, b, empty box, d, e. The bank contains the letters c, f, and g. Which letter completes the strip, and where should it be pasted?

Answer: The missing letter is c. Paste c into the empty box between b and d so the strip reads a, b, c, d, e. The letter c should sit with its body between the baseline and midline.
