Consonant Digraph Word-Building Worksheet: sh, ch, th Practice

Worked example / complete source key

Picture clue: a small round piece used as a game token or eaten as a snack. Blank spaces: _ _ p. Word bank: chip, ship, thin. Build the word and write it using the handwriting convention.

Answer: chip. Only chip matches both the clue and the _ _ p pattern: ship is a boat, and thin does not end in p. The digraph ch completes the word. Write c and h close together; c is an x-height letter reaching the midline, and h has an ascender above the midline. The word matches the clue and appears in the word bank.
