Dolch and Fry Sight Word Tracing Sheets: Design and Use Guide

Original tasks 1, 2 / independent work

Task 1

A tracing row is 18 cm wide. One handwritten word is about 3 cm wide. If you leave 1 cm between words, how many repetitions fit in the row? Use the hypothetical measurements given.

Task 2

A learner copies the word 'said' but the 'd' descender stops at the baseline. Using the convention, what should be corrected, and what should be accepted?

Dolch and Fry Sight Word Tracing Sheets: Design and Use Guide

Original tasks 3, 4 / independent work

Task 3

You have a checklist with columns for word, traced, copied, and note. A learner traced 'come' but copied it with wide spacing between letters. What note is appropriate, and what is the next step?

Task 4

A sheet lists five words but has only tracing rows and no blank copying rows. Using the resource blueprint, what is missing, and how would you fix it?
