Custom Handwriting Sentence Sheets: Ruling Controls and Practice Design

Original tasks 1, 2 / independent work

Task 1

A page has 150 mm usable height. Each block is 12 mm. How many blocks fit, and what x-height does that block height imply if block height is three times x-height?

Task 2

A sentence has 58 characters including spaces. At 20 characters per line, how many lines are needed? If each line uses one 15 mm block, what total block height is required?

Custom Handwriting Sentence Sheets: Ruling Controls and Practice Design

Original tasks 3, 4 / independent work

Task 3

A learner's x-height letters measure 5.8 mm on a sheet with a 5 mm convention and a 1 mm tolerance. Does the work meet the convention? Explain using the tolerance.

Task 4

A sheet has 200 mm usable height and a 4 mm x-height. Block height is three times x-height. A sentence wraps to 18 lines. Does it fit on one page? Show the arithmetic.
